

LAYERS and EGGS

Laying flocks in New England (excluding Rhode Island) produced 2.0 billion eggs in 2006, a decrease of 14 million eggs from the previous year. Maine led the New England states with 1,064 million eggs produced in 2006, followed by Connecticut with 791 million eggs. The average price per dozen eggs in the region in 2006 was

55.8 cents, up 3.5 cents from 2005. Increased prices and a higher brown-to-white egg production ratio in New England brought the value of New England egg production to \$93.8 million in 2006. This is an increase of 6 percent from 2005 which represented a 61 year low for the region.

^{1/} Annual statistics cover the period from December 1 of the previous year through November 30 of the current year.

^{2/} Includes all layers and eggs produced in both table egg and hatching egg flocks regardless of size.

^{3/} Eggs per Layer equals total egg production divided by average number of layers.

^{4/} Handling, shipping, and marketing charges are excluded.

^{5/} New England includes Connecticut, Maine, Massachusetts, New Hampshire, and Vermont. Rhode Island was not included to avoid disclosing data for individual operations.
