## TROUT

In 2006, the value of trout sold in Connecticut, Maine, and Massachusetts totaled \$999,000, compared with \$1.1 million a year earlier. Improved average prices received per pound in 2006 failed to offset the drop in pounds sold, and value fell 11 percent below 2005. There were 24 producers selling trout and 18 hatcheries distributing trout for restoration or conservation purposes in the three New England States in 2006. In Maine, 1.0 million fish six inches or larger were distributed during 2006

and in Massachusetts, 652,000 fish six inches or larger were distributed.

The complete Trout Production report is available on the Internet and includes more information about eggs, size of fish, and losses, as well as separate tables for percent sold by point of first sale.
