

Experience is an asset when it comes to getting the job done right. Now, after more than seven decades of providing environmental services and technologies for the Nation's largest public power system, our expertise is being made more widely available. TVA balances the business of power generation and transmission with environmental stewardship. Experience helps us understand the business and environmental issues facing our clients. We can help you address the environmental issues and allow you more time to focus on your highest priority—your business.

Partnership

TVA understands that each job is unique and requires specialized attention to match appropriate environmental

solutions and technologies to your needs. When we become a part of your team, we bring:

- Dependability and accuracy
- Extensive training, experience, and capabilities
- Reasonable rates
- Full service
- Proven client satisfaction

Principal Clients

- Electric utilities
- Governments
- Manufacturing industries
- Multilateral lending institutions

ReCip® Constructed Wetlands

Energy and Environmental Services and Technologies

Successful companies are looking for innovative solutions. Our services and technologies contribute to your competitive edge by providing practical, feasible, and cost-effective solutions to meet your environmental needs.
