Prepared for the Communities of Presidio, Texas, and Ojinaga, Chihuahua, through a Grant provided by U.S. EPA Region VI, Dallas, Texas, Fendol Chiles, Emergency Planning Coordinator.

This document may be reproduced for the benefit of emergency responders and planners. A&B Environmental Services, Inc., Harlingen, Texas would like to especially thank Mr. Alcee M. Tavaréz, Mayor of Presidio; Antonio Sánchez Morales, Mayor of Ojinaga; Mr. Tom F. Nance, City Administrator, Mr. Joseph Harris, Emergency Management Director, Presidio County, Ms. Cindy Clarke, City Secretary, Fire Chief, City of Presidio, and Protección Civil

CROSS BORDER CONTINGENCY PLAN

**STANDARD OPERATING PROCEDURES FOR THE
CITY OF PRESIDIO, TEXAS, UNITED STATES OF
AMERICA, AND THE CITY OF OJINAGA, CHIHUAHUA, MEXICO**

FOREWARD

Whereas the federal governments of the United States of America and Mexico have recognized that it is advantageous for each to share resources and manpower in times of national disasters, so, too, the municipalities of the City of Presidio, State of Texas, and the City of Ojinaga, State of Chihuahua, recognize their need to cooperate with each other in times of local disasters.

In the event of a disaster of serious proportions which may require a great deal of coordination and cooperation, a plan between the two cities to meet emergencies and disasters will assure, when possible by either city, a full and effective utilization of resources and manpower essential to the safety, care and welfare of all people, property and environment within the two affected federal boundaries.

These Standard Operating Procedures provide an outline of the immediate action to be taken by elected and appointed officials. These procedures also list the organizations that would need to be involved dependent on the extent and nature of the disaster.

When a disaster has been declared, these Standard Operating Procedures will not supersede any local, state, or Federal plan in effect, and authority of any local, state or regional plans still lies with the respective municipalities.

This Cross Border Contingency Plan will become an annex to existing city, state, regional, and federal plans. An emergency under this plan will be declared if the severity and geography of the event warrant outside support services.

All regional, county, and local municipal elected and appointed officials with emergency responsibilities should be fully knowledgeable of the content of this document and be prepared to fulfill their responsibilities when requested and when capable.

CROSS BORDER CONTINGENCY PLAN

AGREEMENT ON COOPERATION BETWEEN THE CITIES OF PRESIDIO, TEXAS AND OJINAGA, CHIHUAHUA IN THE CASE OF AN ACCIDENTAL RELEASE OF HAZARDOUS MATERIALS AND OTHER INCIDENTS

The cities of Presidio and Ojinaga have agreed to provide mutual cooperation to effectively respond to threats to the public health and safety of the communities due to accidental releases of hazardous materials and other incidents requiring mutual assistance. This agreement is to reinforce the cooperation between the cities to be able to respond more efficiently to these releases.

The following statement of principles is intended to serve as a guide to civil emergency authorities in both countries.

1. The agencies of both municipalities charged with emergency responsibilities will seek to ensure that in areas of common concern, plans of the two municipalities for the emergency use of manpower, material resources, supplies, systems, and services shall, where feasible and practicable, be compatible. To this end, a bi-national exercise will be conducted at least every two years to evaluate the coordination of the Sister Cities' emergency plans.
2. The city providing the assistance will supervise its own necessary personnel and assigned equipment in an ordinary circumstance. The group receiving aid will have authorized persons to provide general directions related to the work. The Potentially Responsible Party (PRP) for the spill receiving the assistance will be responsible for providing the necessary materials, food, shelter, temporary housing, gasoline and lubricants for the equipment and any other such items needed to respond adequately, at the job site for the personnel lending their services.
3. It is mutually understood that this agreement does not relieve any of the mentioned parties of the obligation necessary for providing protection against fires, according to their respective jurisdictions, being in agreement to use reasonable diligence in maintaining fire equipment in adequate condition according to industry standards. Each Sister City may decide not to render aid, depending on each incident, if its resources are not capable of meeting obligations in its own jurisdiction.
4. With the exception of the ruling to carry out the assistance mentioned above, no other party in this agreement will be required to pay compensation to the other group, for services rendered. The mutual advantage and protection given by this Agreement is of mutual consideration.
5. Each party agrees to the compensation, thereby holding each other harmless from acts, which may arise, resulting in any act or omission of any party's fire personnel during such time that said personnel are serving in the jurisdiction of any party for assistance pursuant to the terms of this Agreement.

6. The Agreement shall not be construed as an agreement for the benefit of any third party, taking effect at the time of execution and will continue until rescinded.
7. Every two years, the parties will examine the present agreement in light of its application, in order to decide if it must be modified. Nevertheless, the parties may examine this matter and propose changes to the other parties by personal service or registered mail. Changes will be considered effective, starting on the date of the amendments' signing by all parties.
8. Any party to this Agreement may withdraw at any time, giving thirty days' prior written notice to all the parties. On the thirty-first day after the notice, such withdrawal will become effective.
9. Any party may change its service address by five days' written notice to each of the other parties. On the sixth day after the notice, such change of address is effective.
10. Notice of withdrawal and change of address shall be served by personal service or by the respective party's Postal Service certified mail, addressed to:

Mayor Alcee M. Tavaréz
 City of Presidio
 P.O. Box 1899
 Presidio, Texas, 79845 USA

Presidente Municipal, Antonio Sánchez Morales
 Palacio Municipal
 Ojinaga, Chihuahua, México

In witness, whereof, this Agreement has been executed on the _____ of _____ 2004.

Mayor	Presidente Municipal
Presidio, Texas	Ojinaga, Chihuahua

CROSS BORDER CONTINGENCY PLAN

STATEMENT OF PRINCIPLES CONCERNING UNITED STATES - MEXICO COOPERATION ON CIVIL EMERGENCY PLANNING

1. The following Statement of Principles is intended to serve as a guide to civil emergency authorities in both countries.
2. Nothing in this agreement shall derogate or diminish the application of Mexican law in Mexico or United States law in the United States. However, the authorities of either country may request the assistance of the other country in seeking appropriate alleviation if the normal application of law in either country might lead to delay or difficulty in the rapid execution of necessary civil emergency measures.
3. The agencies of both governments charged with civil emergency responsibilities will seek to ensure that in areas of common concern, plans of the two governments for the emergency use of manpower, material resources, supplies, systems and services shall, where feasible and practicable, be compatible. The decision to render aid to the Sister City rests ultimately with the Fire Chief. Each Sister City may decide not to render aid, depending on each incident, if its resources are not capable of meeting obligations in its own jurisdiction.
4. Each government will use its best efforts to facilitate the movement of evacuees, refugees, civil emergency personnel, equipment or other resources into its territory or across its territory from one area of the country to another when such movement is desired to facilitate civil emergency operations in either country. To this end:
 - a. To the maximum extent permitted by law and regulation, the Government of the United States and the Government of Mexico, during a period of an emergency, use their best efforts to reduce to a minimum any delays, which might otherwise be caused by border crossing requirements. Both governments will also use their best efforts to ensure that civil emergency equipment, facilities, and supplies may be used effectively and to mutual advantage in joint efforts, tests, preparations and exercises.
 - b. The civil emergency agencies of both governments will consult together to identify and remove any serious potential impediments to cross border assistance, emergency operations and the cross border flow of commodities for emergency response. Unresolved problems will be reported to the Joint Response Team for appropriate action.
5. For the purpose of emergency relief, health and welfare services, each government will use its best efforts to ensure that those citizens or residents of the other country in its territory are treated in a manner no less favorable than its own citizens.

6. Each government will use its discretionary powers, as far as possible, to avoid a levy of any national tax on the services, equipment and supplies of the other country when these are utilized in civil emergency activities in the territory of the other, and will use its best efforts to encourage state, provincial, and local authorities to do likewise.
7. When transportation, communication and related facilities and equipment that are subject to the control of one government are made available for emergency use to the other government, the charges to that government shall not exceed those paid by similar agencies of the government making these resources available. To this end, mutually acceptable arrangements shall be worked out as necessary by the two governments.
8. In its emergency planning, each government will include provisions for adequate security and care for the personnel, equipment, and resources of the other country entering its territory by mutual agreement in pursuance of authorized civil emergency activities. Such provisions will also ensure access to supplies necessary for their return.
9. Transportation equipment and other equipment presently in one country at the onset of an emergency may be temporarily employed under mutually agreed terms by the appropriate authority of the country in which the equipment is located.
10. Perishable or other readily consumable supplies located in one country at the time of an emergency but owned by parties in the other country may be disposed of under mutually agreed terms by the appropriate civil emergency authorities of the two countries.
11. Each government will call to the attention of its state, provincial, local or other authorities in areas adjacent to the international border the desirability of achieving compatibility in civil emergency planning in the United States and Mexico. For the purpose of achieving the most effective civil emergency planning cooperation possible between the United States and Mexico, each government will, in a manner consistent with national plans and policies, also encourage and facilitate cooperative emergency arrangements between adjacent jurisdictions on matters falling within the competence of such jurisdictions.

EMERGENCY NOTIFICATION

Any substantial threat to the public health, safety, or the environment, due to an accidental spill or release of an oil or other hazardous material into the air, surface water, groundwater, or onto the ground, or the threat of any of the preceding should be reported to:

1.0 INTRODUCTION

In January 1988, the United States of America and the United Mexican States signed the Joint United States of America - United Mexican States Contingency Plan for Accidental Releases of Hazardous Substances along the Border. The Joint Contingency Plan (JCP) provides a framework for cooperation between Mexico and the United States in response to an accidental chemical release incident that may pose a significant threat to both countries, or that affects one country to such an extent that assistance is necessary. As a part of the preparedness and response component of the Joint Contingency Plan, a Sister Cities program was established, which pairs 28 cities along opposite sides of the U.S./Mexico border from California through Texas. This program calls for the preparation of Sister City Hazardous Materials Incident Contingency Plans for each of the 14 pairs of cities.

This document is a first step in the preparation of a joint contingency plan for the Presidio, Texas/Ojinaga, Chihuahua area. It represents a summary of the hazardous materials notification and response protocols in place for Presidio, Texas, Ojinaga, Chihuahua, and other jurisdictions, as promulgated by local plans. This plan specifically addresses the requirement under the Joint Contingency Plan to prepare Sister Cities plans. It is not intended to replace or supplant any other plans in effect in the region, but is designed to aid in a binational response to a hazardous materials incident that may affect the border.

This plan at no time usurps existing federal, state, county, regional, or municipal plans within the jurisdictional boundary addressed by this plan.

If the region affected declares an emergency under this plan to be in effect, the municipality affected will, subject to its own disaster plan, inform state and federal officials, as identified in their respective plans. The Cross-Border Contingency Plan is activated for the short term only, and it will provide specifics for the coordination of resources and equipment.

The initial and prime responsibility for providing immediate assistance rests with the city, county or regional government affected. It is at this level that services such as fire, police, health, and social services, public works, and public utilities are located. An emergency under the Cross Border Contingency Plan may be declared when (1) a city, county or region so requests the head of government, (2) the emergency, due to geography, may dictate evacuation into a neighboring region, (3) that the municipality, county or region affected may request mutual aid support, supplying manpower, resources, social services, fire, public works, emergency health services, and other specialized expertise as deemed necessary by the affected municipality, or (4) the emergency may affect a neighboring municipality, county, or region.

The Plan promotes timely and effective coordination and response between the private sector (industry, other potentially responsible parties and citizens) and public sector (local, state, and federal governments). The primary objective of the plan is to develop communication capabilities and encourage coordination of independent response resources acting within local jurisdictions. The plan aids understanding of regional capabilities and resources and provides a background for planning coordination with state and local officials.

Secondary objectives include the development of notification systems between response organizations in the different countries, and developing international mutual aid agreements. The secondary objectives are being addressed through ongoing cooperative efforts between local planners in Presidio, Texas and Ojinaga, Chihuahua, United States Environmental Protection Agency (U.S. EPA Region VI), the Mexican Civil Protection Agency (Protección Civil), and the Secretaría de Gobernación.

1.1 Presidio, Texas - Ojinaga, Chihuahua Plan Area

This plan covers the U.S./Mexico Sister City pair of Presidio, Texas, and Ojinaga, Chihuahua (Figure 1). The Presidio/Ojinaga Sister Cities is the only legal port of entry to Mexico between El Paso and Del Rio. The Cities of Presidio/Ojinaga are located at the confluence of the Rio Grande and the Rio Concho Rivers. Certainly a very important factor, which enhances the economic environment at Presidio, is the International Bridge. The Presidio/Ojinaga International Port can serve as a link between Dallas and Fort Worth and the west coast of Topolobampo, Sinaloa, Mexico.

With its location in the southern part of Presidio County, the most mountainous country in the state, the City of Presidio has an altitude of 2,594' above sea level. Famous for being the "hottest spot" in the United States, it's low humidity and dry desert climate average an annual high of 87.67 degrees with peak temperatures reaching well beyond 100 degrees during the summer months. The average low temperature was 54.83 degrees with a low of 31 degrees during the month of December. The annual average of precipitation for 1998 was 5.42". The City of Presidio is located in the County of Presidio next to the Rio Grande River in Southwest Texas bordering Mexico. It is 59 miles South of the community of Marfa, which is the County seat.

Presidio is currently seeing a rapid increase in its population due to the free trade agreement with Mexico. The City of Presidio currently has a population of 4173, a 240% increase from 1980. It is estimated that the population will increase to 11,793 persons by the year 2011.

The city of Ojinaga has a surface of 9,500.50 square kilometers that represent 3.85% of the state surface and 0.49% of the national surface and it is located at Latitude 29° 34', Longitude 104° 24' and an altitude of 840 meters above sea level. Ojinaga is a very small farming community of approximately 60,000 persons. Growth is low and stabile, reflecting its remote location and agrarian composition. Ojinaga is one of the largest entries for export feed and cattle in the nation. Ojinaga sits on grassland and rolling terrain near the banks of the Rio Grande River. The climate is hot and humid almost the entire year. The region experiences heavy rains at times, and is affected by the Gulf streams and the hurricane season in South Texas.

1.2 Authority

This plan was developed in accordance with the following federal statutes and agreements for both countries.

1.2.1 Statutes

- "Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980," PL 96-510; and
- "Emergency Planning and Community Right-to-Know Act (EPRCA) of 1986," PL 99-499 (Title III of "Superfund Amendments and Reauthorization Act (SARA) of 1986," PL 99-499).

1.2.2 Regulations

- 40 Code of Federal Regulations, Part 300, "National Oil and Hazardous Substances Pollution Contingency Plan," (Revised March 8, 1990); and
- 29 Code of Federal Regulations, Part 1910.120, "Hazardous Waste Operations and Emergency Response," (Revised July 1, 1989).

1.2.3 Bi-national Agreements

- Agreement Between the United States of America and the United Mexican States on Cooperation for the Protection and Improvement of the Environment in the Border Area (August 14, 1983); and
- Annex II to the Agreement (July 18, 1985).

1.3 Other Applicable Contingency Plans

Sections of the plans described below were adapted for use in various components of this plan.

1.3.1 Local Contingency Plans

- City of Presidio /Marfa County Local Emergency Planning Committee (LEPC) Emergency Management Plan.

This annex creates an umbrella to protect the health, safety and property of the public from hazardous materials incidents in Presidio. The plan identifies mitigation, preparedness, response, and recovery activities relevant to hazardous materials response and any other incidents.

- Ojinaga Emergency Response Plan.

This is Annex III to the State of Chihuahua's local emergency response plan for sister cities. The plan identifies mitigation, preparedness, response, and recovery activities relevant to hazardous material response and any other hazards.

1.3.2 State Contingency Plans

- State of Texas DEM 10 Plan.

The state response plan, developed by the Texas Department of Public Safety (DPS) Division of Emergency Management (DEM), describes the procedures, responsibilities and methodology by which the State of Texas will respond to hazardous materials incidents. This plan provides for the support of many state agencies in large-scale hazardous materials incidents by establishing clear methods for interacting with local government.

- State of Chihuahua Emergency Response Plan

Protección Civil of the State of Chihuahua developed and implemented a state contingency plan in 1994. This plan is based on the Guía Técnica Para Implementación Del Plan Municipal De Contingencias. This guide, which is printed by the National Civil Protection Agency, provides a guideline by which the state and municipal civil protection agencies will prepare their plans.

1.3.3 Federal Contingency Plans

- National Contingency Plan (9/5/94)

The National Response Team (NRT) developed the National Contingency Plan (NCP) for responding to releases or spills involving oil or other hazardous materials throughout the United States.

- National System For Civil Protection Plan (1990)

Gobernación developed the National System for Civil Protection for responding to all disasters including releases or spills involving oil or other hazardous materials throughout the United Mexican States.

- U.S. EPA Region VI - Regional Contingency Plan

The U.S. EPA Regional Response Team (RRT), Region VI, is currently revising a contingency plan which outlines procedures in the event of a release or spill occurring in its region, which includes the states of Texas, New Mexico, Arkansas, Louisiana, and Oklahoma.

1.3.4 International Contingency Plans

- Joint United States of America - United Mexican States Contingency Plan for Accidental Releases of Hazardous Substances along the Border (January, 1988).

The Joint Response Team (JRT) has developed a contingency plan to respond to spills requiring international coordination between the United States and Mexico.

- Manual for Standard Operating Procedures Based Upon a Cooperative Agreement Between the Mexican Republic and the United States of America to Coordinate Our Joint Responses in the Event of Spills of Petroleum Hydrocarbons and Other Noxious Substances in the Marine Environment (1994).

The U.S. Coast Guard, U.S. Department of Transportation and the Mexican Navy have developed a Gulf Coast Response Plan for hydrocarbon and other noxious substances spills in the marine environment, requiring international coordination between the United States and Mexico.

2.0 CONCEPT OF OPERATIONS

This concept of operations provides an integrated and coordinated joint bi-national response effort to supplement the local emergency response plans following the release of hazardous materials in the geographical area covered under this plan.

2.1 Notification

Any release or substantial threat of a release of a hazardous material affecting or likely to affect another party shall be reported to that party without delay. Appendix A is an emergency response assistance directory that provides contact information.

2.2 Private Response Mechanisms

As Potentially Responsible Parties (PRPs), owners or operators of fixed facilities and transportation facilities, including truck and rail lines and pipelines, must comply with all local, state, and federal hazardous material planning and reporting requirements.

2.3 Local Response

In City of Presidio, the Fire Chief will assume the lead role as Incident Commander (IC). If the incident is beyond the control and/or capabilities of the Presidio Fire Department, or the incident might impact the border with the United Mexican States, the Incident Commander will request activation of the City Emergency Operations Center (EOC). This request will initiate a bi-national notification response for mutual aid from Ojinaga.

If the incident is beyond the capabilities of both cities, the Fire Chief may request for the State of Texas to initiate a Joint Response Team response.

In Ojinaga, the system of response will follow established response Standard Operating Procedures (SOPs). This response will be similar to the response in Presidio. If the Incident Commander feels that the incident will exhaust the resources available, or that the incident might impact the border, a request will be initiated to the Presidio Fire Department. As with the Presidio response, the bi-national response will involve requesting mutual aid from Presidio.

If the incident is beyond the capabilities of both cities, then the Fire Chief of Ojinaga may file a petition with Protección Civil to initiate a Joint Response Team response.

2.4 State Response

The State of Texas can provide assistance for hazardous materials incidents to Presidio, Presidio County, if the combined PRP and local capabilities or resources prove to be insufficient or inadequate. The State will appoint a State On-Scene-Coordinator (SOSC) who will assist the Incident Commander by providing and overseeing needed state resources.

The State of Chihuahua can provide assistance through the state's Civil Protection System Coordinator for hazardous materials incidents to Ojinaga, if the combined Potentially Responsible Parties and local capabilities or resources prove to be insufficient or inadequate. The state will appoint a State On-Scene-Coordinator (SOSC) who will assist the Incident Commander by providing and overseeing needed State resources.

2.5 Federal Response

The U.S. Federal government can provide assistance for hazardous materials incidents if combined local and state capabilities or resources prove insufficient or inadequate. Once the National Response Center (NRC) has been notified of a release, it alerts the Federal On-Scene-Coordinator (FOSC), who may activate the Regional Response Team (RRT) or the National Response Team (NRT), depending on the severity of the incident. For incidents occurring in Presidio, the Federal On Scene Coordinator will be from U.S. EPA Region VI, headquartered in Dallas, Texas.

Normally, the U.S. EPA contributes to the response by working with the local, state, tribal and federal agencies and citizens to assure that the information needed to maximize the effectiveness of the response effort is easily accessible. If there is a spill where the Potentially Responsible Party is not identified, does not respond to contain or clean up the material, or does an inadequate job responding, federal responsibilities outlined in the National Contingency Plan include assisting local responders in the response or, in some circumstances, taking over the response.

Federal agreements between the U.S. and Mexico require that each country notify the other of hazardous materials incidents if there is a release or substantial threat of release, which may impact both sides of the border.

If it appears that the incident will reach a level at which local and state resources will be insufficient to bring the event to a successful conclusion, the Federal On Scene Coordinator in conjunction with the Regional Response Team, will initiate a Joint Response Team response, and implement the Joint Contingency Plan.

Procedures for following the Joint Contingency Plan, and initiating a U.S./Mexico Joint Response Team operation are detailed in Section 4.

The Mexico Federal Government can provide assistance through the National Civil Protection System for hazardous materials incidents to Ojinaga, if the combined Potentially Responsible Parties and local capabilities or resources prove to be insufficient or inadequate. The State will

appoint a State On-Scene-Coordinator (SOSC) who will assist the Incident Coordinator by providing and overseeing needed state resources.

3.0 INCIDENT RESPONSE OPERATIONS

This plan employs the phases of operational response to an incident as outlined in the Joint Contingency Plan.

3.1 Discovery and Notification

Upon the discovery of a hazardous materials release or threatened release within the City of Presidio or any other dangerous incident that requires mutual assistance, a notification is made to the appropriate emergency organization. The initial notification will involve calling 911 to notify the Presidio Fire Department. The agency receiving the initial contact will follow the Presidio Fire Department's Standard Operating Procedure (SOP) for the notification of all other appropriate agencies. The Potentially Responsible Party is also required to notify appropriate Federal and state agencies by contacting the National Response Center and the Texas Commission on Environmental Quality (TCEQ) Spill Response Center. These agencies will also notify appropriate local, state, and federal agencies.

For Ojinaga, the Potentially Responsible Party will follow the normal reporting procedures for the City of Ojinaga, which includes calling 060, Protección Civil and Departamento de Bomberos.

The authority of local government, municipalities, and counties for spill response is similar to authority for other emergency responses for protection of public health and safety, such as response to fire, flood, and civil disturbance. Federal and state laws impose notification requirements to ensure a coordinated response.

Agreements between the governments of the United States and Mexico require that the countries notify each other in the event of a release or substantial threat of a release of a hazardous substance, pollutant, or contaminant affecting, or likely to affect the other country (Joint Contingency Plan Section 202.1).

3.2 Preliminary Assessment and Initiation of Action

The first official on the scene will assume the role of Incident Commander. This duty will be relinquished to the appropriate official upon his arrival at the incident. All agencies report to the established Incident Commander for all response and recovery operations. Each agency will provide its own special equipment and reference data, and will function within its field of expertise. If an incident exceeds the resources of the local or county agencies, the appropriate state agency may assume Incident Commander duty and coordinate the response and resources of the state agencies. This function may be transferred to the Federal On Scene Coordinator, if a federal response is activated.

3.2.1 Preliminary Assessment

The first response unit to arrive at the incident will determine whether a potentially hazardous material was released. The first official on the scene assumes the role of Incident Commander until the designated official arrives to coordinate the response.

3.2.2 Initiation of Action

Upon arrival on-scene, the predesignated Incident Commander will implement the following actions:

- Relieve the first official on-site;
- Establish an Incident Command Post (ICP) and implement the Incident Command System (ICS); and
- If the incident threatens the border or the City of Ojinaga or Presidio, the Incident Commander will insure the appropriate notifications are made to the Joint Response Team, and if mutual aid will be required, insure that the proper notifications are made to implement a bi-national response.

3.3 Containment

The Incident Commander will implement appropriate measures to contain, restrict, reduce or eliminate the release or threat of release of hazardous materials at the incident, as well as downstream or downwind from the site. This includes defensive action to prevent, minimize, or mitigate an incident to protect public health and the environment.

3.4 Documentation and Cost Recovery

All actions taken during hazardous materials incidents will be carefully documented so that sufficient and accurate information is available to support the response and recovery operations, and to recover costs, if applicable. Documentation should be self-descriptive to prove the source and circumstances of the incident, identity of the Potentially Responsible Parties, and impact or potential impact to public health and the environment. Documentation may be written, graphic, audiovisual, or in other form and will include the location of the incident, time, date and duration of the spill, source and cause of the incident, name of the Potentially Responsible Parties, description of the released material, resources affected or threatened, status of response and cleanup efforts, and accurate accounting of public costs incurred.

Examples of other forms of documentation of hazardous materials incidents include:

- Daily or personal logs in bound notebooks, to record all relevant response activities for evidential purposes;
- Photographic documentation at the source of the release, pathway of discharge, and affected biota;

- Samples of released material and material from the suspected source, collected according to established chain of custody procedures; and/or
- Statements of witnesses identifying the source of a release.

3.5 Evacuation or Shelter-In-Place

It is the responsibility of the Incident Commander to assess the hazardous materials release or potential release. If there is a threat to the public, immediate action needs to be taken for their protection. Actions, which protect the public, include first aid, search and rescue, designation of an exclusion zone, shelter-in-place, fire suppression and evacuation.

If evacuation is necessary, the Incident Commander will determine the area that will require evacuation. The Incident Commander is also responsible for estimating the number of people in the evacuation area and number of people needing transportation assistance. The Incident Commander will follow all the appropriate Standard Operating Procedures (SOPs) outlined in the local plans.

The Incident Commander will coordinate with law enforcement to identify major evacuation routes and establish traffic control points. Law enforcement will establish evacuation assembly points, monitor traffic flow on evacuation routes and establish security patrols and access control procedures. In a toxic environment, agencies with more appropriate protective clothing and equipment may be called upon to perform these tasks.

If the incident is of sufficient magnitude that the potential for a cross border evacuation exists, the Incident Commander will insure that the appropriate border agencies such as immigration, customs, and bridge authorities are notified (see Appendix B).

3.6 Post-Incident Management

The Incident Commander, or a designated replacement, is required to remain on-scene until the immediate danger to public health and the environment has been abated. Primary responsibility for the actual cleanup and restoration costs will remain with the Potentially Responsible Parties. In the event that the Potentially Responsible Parties are unknown, cleanup is the responsibility of the parcel manager, the lessee, the landowner, the affected jurisdiction, the county agency, the state agency, or the federal agency having jurisdiction.

Cleanup and disposal of the spill should be accomplished as soon as possible. Prompt action is important to minimize damage to the environment. The first step is to establish the cleanup priorities at the site. Once the priorities are set, determination of appropriate cleanup methods are necessary. The cleanup actions must be constantly monitored to ensure the cleanup priorities are being properly addressed.

Specific methods should be utilized to evaluate the cleanup and determine its effectiveness. The evaluation process should assess impacts on the habitat and organisms, effectiveness of removal, public concerns, aesthetics, and costs. The Incident Commander must develop criteria to determine when the cleanup is complete, using applicable or relevant and appropriate

requirements. The Incident Commander will ensure proper transportation and disposal of hazardous substances in compliance with local, state and federal laws.

3.7 Response and Cleanup Funding Availability

The Incident Commander will attempt to identify and have the party accountable for the release assume responsibility for containment, removal and disposal. In Mexico, this will be responsibility of the Civil Protection Authorities in accordance with the National Protection System.

If it is determined that the Potentially Responsible Parties are not acting promptly, taking or proposing to take appropriate actions, or if the Potentially Responsible Parties are unknown, state and federal funds may be made available to ensure proper cleanup.

Funds may be made available by the State on Scene Coordinator or the Federal on Scene Coordinator. Depending on the circumstances, money may be made available from one or more of the following funds.

3.7.1 State Funds

The Texas Natural Resource Conservation Commission (TNRCC) Emergency Response team maintains funds that can be used for the response to hazardous materials incidents. These funds are available on a case-by-case basis, generally for incidents for which a responsible party has not been identified, or when there is an immediate threat to life and health. These funds can be accessed by contacting the TNRCC at (512) 463-7727.

3.7.2 Federal Funds

Hazardous Substance Response Trust Fund (Section 2.1.1, "Comprehensive Environmental Response, Compensation and Liability Act") is administered by the U.S. EPA. The fund can be accessed by contacting the NRC at (800) 424-8802, or the FOSC.

Local Government Reimbursement Program is administered by the U.S. EPA. The fund can be accessed by contacting the RCRA-Superfund Hotline at (800) 424-9346.

3.8 Communications

Communications will be established as per the local municipal Standard Operating Procedures (SOPs). In the event of a bi-national response, communications must be effectively established as soon as possible.

Due to the numerous radio frequencies used by the various response agencies in the Sister Cities area, the Incident Commander must define a primary response channel or rely on cellular communications. Appendix A and C provide a listing of the various phone numbers available. Communications between the Ojinaga Command and the Presidio Command must be established

and maintained throughout a bi-national response. This will ensure a secure and reliable flow of information between the two commands.

3.9 Health and Safety

The Incident Commander will be responsible for appointing a Site Safety Officer (SSO) for the incident. The Incident Commander and Site Safety Officer will be responsible for developing and implementing a Site Safety Plan to ensure the health and safety of all response personnel. For response across the border, the Incident Commander and senior official of each response agency will ensure that the appropriate state and federal worker health and safety laws of their country are observed while in the neighboring country.

4.0 NATIONAL NOTIFICATION AND/OR RESPONSE

The Joint Contingency Plan has been signed and implemented by the United States and the United Mexican States.

4.1 Mutual Aid Response

In the event that a hazardous materials incident has overwhelmed the resources of Ojinaga or Presidio, the Incident Commander or the Commandant de Protección Civil will implement a request for mutual aid from the other Sister City.

4.1.1 City of Ojinaga Request

The Ojinaga Fire Chief or equally responsible official will initiate a request for mutual aid by contacting the Presidio Fire Department Chief. Upon receipt of this request, the Presidio Fire Chief will make a determination of appropriate actions and whether or not he is capable of responding without endangering his own responsibilities.

The City of Presidio may respond with the appropriate resources to aid in the request, utilizing the Fire Department's Standard Operating Procedures (SOPs) for HazMat response. These resources will be determined by a Joint Command established between the Presidio/Ojinaga Fire Chiefs. The responding resources will report to the Incident Commander and work under the Incident Commander's direction. Presidio will also activate an Emergency Operations Center on the Presidio side of the border. The Emergency Operations Center will evaluate the ongoing situation, and assist the Incident Commander with resources and technical information. The Emergency Operations Center will also be responsible for ensuring that response personnel from Presidio are adequately utilized in an effective and safe manner, by coordinating with the senior on-scene response official from each responding agency.

4.1.2 City of Presidio Request

The Presidio Fire Chief may initiate a request for mutual aid by contacting the Ojinaga Fire Chief or other responsible official. Upon receipt of this request, the Ojinaga Fire Chief may implement the mutual aid request by providing necessary action, information and/or assistance resources, if possible.

The City of Ojinaga may respond with the appropriate resources to aid in the request. These resources will be determined by a Joint Command established between the Presidio/Ojinaga Fire Chiefs. The responding resources will report to the Incident Commander and work under the Incident Commander's direction. Ojinaga may activate its equivalent Emergency Operations Center in accordance with the Protección Civil municipal authorities. The Emergency Operations Center will evaluate the ongoing situation, and assist the Incident Commander with resources and technical information.

The Incident Commander is also responsible for ensuring that response personnel from Ojinaga are adequately utilized in an effective and safe manner by coordinating with the senior on-scene response official from each responding agency.

4.1.3 Response Duties

Local agencies are responsible for emergency planning and preparedness within their jurisdictions. The agencies are expected to assume lead roles during the emergency phase of the incident. Local agencies will conduct response activities within the scope of department training and capabilities. Local agencies will provide emergency response services when possible including, but not limited to:

- notification;
- initial hazard identification;
- initial sampling to determine concentrations of materials, if possible;
- communications;
- rescue and emergency medical service;
- fire fighting;

- security (site perimeter, traffic, and crowd control);
- on-scene liaison with other agencies and organizations; provide public information;
- evacuation; and shelter.

Local government assignments in Presidio, Texas, are generally shared among the Presidio Fire Department, Presidio County Sheriff's Department, Presidio Police Department, Presidio County Rural Volunteer Fire Department, emergency medical services, public works and health department. Detailed roles and responsibilities of these agencies can be found in the Presidio and Presidio County plan. Specific actions to be taken in response to a bi-national response can be found in Appendix D through G of this plan. When responding to requests for mutual aid, local response agencies from both sides of the border will adhere to their department Standard Operating Procedures. At no time should personnel from either city be requested to perform duties outside their training and capabilities. Incident Commanders in both cities will become familiar with the capabilities of the agencies available for response, and use the personnel from the agencies in an appropriate manner. If concerns arise, the Fire Chief Joint Command and respective Emergency Operations Centers will be notified and an appropriate decision will be made at that level.

4.2 Joint Response Team

When the magnitude of an incident exceeds local and state response capabilities, or when a response involves more than one state jurisdiction, or federal lands, the federal government will coordinate the response operation and provide assistance as necessary. Regional level contingency planning is performed by the U.S. EPA Regional Response Team, and national level contingency planning through the National Response Team (NRT). In Mexico, Protección Civil has jurisdiction of hazardous materials incident planning. The Joint Response Team performs U.S./Mexico border area contingency planning and training activities. The Joint Response Team is chaired by the U.S. EPA for the U.S. and by Gobernación for Mexico.

4.2.1 U.S. Environmental Protection Agency

The U.S. EPA activates and operates the federal response system for inland hazardous materials incidents and provides a Federal on Scene Coordinator who can assess technical resources to provide expert advice on public health and environmental effects of a release.

4.2.2 Regional Response Team

The Regional Response Team (RRT) is co-chaired by the U.S. EPA and the U.S. Coast Guard and consists of representatives from selected state and federal agencies. It plans, prepares and responds to hazardous materials incidents, providing advice and recommendations to the Federal on Scene Coordinator. It may request resources from local, state or federal agencies and the private sector.

4.2.3 Protección Civil

The Dirección de Protección Civil shall establish, in each federal and municipal entity, civil defense organizations to handle emergencies occurring in each jurisdiction. Protección Civil has prepared the "ANEXO III - Plan de Respuesta a Emergencia Con Materiales Peligrosos" (Annex III - Hazardous Materials Response Plan). This plan is designed to be used by all entities in Mexico to aid in developing contingency plans for Hazardous Materials incidents and is co-

chaired by the Director of the Chemical Emergency Preparedness and Prevention Office (CEPPO) in Washington D.C.

4.3 Joint Response Team Responsibilities

For inland releases, the U.S. EPA provides the Federal on Scene Coordinator. Upon notification of a release of hazardous substances that are crossing or are likely to cross the U.S./Mexico border, the National Response Center will notify the Federal On Scene Coordinator. The Federal on Scene Coordinator will determine as quickly as possible the need for activating the Regional Response Team, the Joint Response Team, the Environmental Response Team (ERT), or the National Response Team. For incident notification in Mexico, Protección Civil maintains a 24-hour telephone number in Mexico City.

When the U.S. and Mexico have agreed to initiate a joint response to an incident, the function and responsibilities of the Joint Response Team include:

- Advise the Federal On Scene Coordinator about measures needed to respond to the incident and what resources are available to carry out those measures;
- Evaluate and make recommendations concerning the measures taken by the Federal on Scene Coordinator;
- Provide continuing advice to the Federal on Scene Coordinator;
- Coordinate and use, as appropriate, the resources that agencies or persons of the U.S., or Mexico, or a third party can contribute;
- Assist the Federal on Scene Coordinator in preparing information releases for the public; and
- Participate in the termination of response.

5.0 TRAINING AND EXERCISES

The Cross Border Contingency Plan, as written pursuant to the U.S./Mexico Joint Contingency Plan, is an administrative summary of the relevant hazardous materials emergency response plans, which have jurisdiction within the planning area. Each of the operational plans referenced requires training and exercising to ensure that responders are always in a state of readiness. The concepts and resources for training and exercising are important to emphasize as bi-national relationships and activities develop.

Preparing a written plan with well-defined operational roles, policies and resource acquisition procedures is an essential step. The written plan should contain training requirements and procedures for responders. Exercising the plan provides training, allows response personnel to become thoroughly familiar with response procedures, resources and systems, and enables planners to identify areas of the plan, which need improvement. Appendix H and I present the Acronyms and Definitions, respectively. Appendix J presents references to response procedures and understandings from various agencies.

5.1 Training

Individual agencies are responsible for their own training. Internal training, private contractors, and state or regional training resources are some of the options available to local agencies. Agencies must ensure that personnel are adequately trained for response operations that they may perform. This training must comply with all applicable local, state, and federal worker health and safety regulations.

5.2 Exercises

Local and regional hazardous materials contingency plan exercises are encouraged, as they are the best means of keeping the plans current and active. Presidio/Ojinaga routinely conduct joint exercises that allow for cross training of personnel. This ensures that deficiencies in response activities are identified. In keeping the Presidio/Ojinaga Sister Cities Hazardous Materials Incident Contingency Plan current, the plan will be exercised once every two years.

APPENDIX B

CUSTOMS AND IMMIGRATION RESPONSE

In the case of an emergency and/or disaster that may occur in Mexico or the United States which requires emergency aid from various U.S. local or state agencies, including the Presidio Fire and Police Departments or aid from a similar Mexican agency, the municipality requesting aid will notify one of the following:

- 1) U.S. Customs Service
- 2) U.S. Immigration and Naturalization Service
- 3) Presidio International Bridge System

Upon receipt of the call requesting emergency aid, the Customs, Immigration or Bridge personnel will immediately notify the other two groups, who will be responsible for notifying their “cross the border” counterpart.

The U.S. Customs shift supervisor at the bridge of concern will be contacted and will take whatever immediate action is necessary to facilitate the crossing of the emergency equipment and personnel. Once arrangements have been made to facilitate the cross border emergency aid, the supervisor will notify the Assistant Director, Inspection and Control or in his absence any available Chief Inspector.

Emergency equipment of this nature is admissible under section 10.107 of the Customs Regulations.

UNITED MEXICAN STATES CUSTOMS CROSS BORDER CONTINGENCY PLAN

In the case of an emergency and/or disaster that may occur in Mexico or the United States which requires emergency aid from various ROM local or state agencies, including the Ojinaga Fire and Police departments or aid from a similar U.S. agency, the municipality will call and notify one of the following:

- 1) Mexico Customs Service
- 2) Mexico Immigration and Naturalization Service
- 3) Ojinaga Bridge Department
- 4) Fire Department

Upon receipt of the call from the municipality which has requested the emergency aid, the Customs, Immigration or Bridge personnel will immediately notify the other two groups, who will be responsible for notifying the “cross the border” counterpart.

Mexico’s Customs shift supervisor at the bridge of concern will be contacted and will take whatever immediate action is necessary to facilitate the crossing of the emergency equipment and personnel. Once arrangements have been made to facilitate the cross border emergency aid, the supervisor will notify Protección Civil.

APPENDIX D

ACTION BY LAW ENFORCEMENT AGENCIES

GENERAL

In any type of disaster that evokes an international response, law enforcement will be involved in a multitude of areas. The need for security, traffic control, crowd control, and to supply effective information on separated persons, specifically in relocation areas, will be paramount.

PROCEDURES

In the event of a disaster being declared by the municipalities, counties, states, or countries represented in this plan, Law Enforcement Agencies will follow their appropriate municipal, county, or regional contingency plans. The Cross Border Contingency Plan is considered an annex to the standing municipal, county, or regional plans and law enforcement agencies responsible to these plans will work within the same framework of the individual plans adopted by law.

In the event that evacuation from a disaster area into another municipality, county or country takes place, Law Enforcement Agencies will supply the following:

RESPONSIBILITIES AND FUNCTIONS

- i. To protect life and property and prevent and investigate crime that may be generated due to the evacuation.
- ii. To alert persons endangered by the effects of the disaster.
- iii. To alert and assist other emergency services.
- iv. To control traffic and crowds and ensure clear entrance and exit to and from cross border bridges and the control of traffic to designated holding areas.
- v. To maintain law and order at the holding (reception) areas to prevent unauthorized entry into these areas.
- vi. To evacuate citizens from danger areas when necessary.

To establish communication links with all law enforcement agencies affected and to supply constant information through the affected municipality, subject to law enforcement needs.

APPENDIX E

STANDARD OPERATING PROCEDURES FOR FIRE AGENCIES

GENERAL: Three distinct fire disaster situations could arise, requiring the assistance of cross border fire service. A **level-one** incident or situation occurs when specialized equipment and/or manpower is most readily or exclusively available across the border or the municipality's usual local mutual aid resources are fully engaged. **Level-two** situations are defined as incidents where countywide or region-wide fire resources are fully engaged and additional fire service assistance is needed beyond the capability of the county or region. **Level-three** fire disasters require an executive declaration either from a state or local executive. The decision to respond rests with the Fire Chief and is determined case by case by his capability to cover his jurisdiction and render aid at the same time.

1) Liability

A. Any loss or damage to, or expense incurred in the operation of fire apparatus or other equipment answering a call for assistance from outside territory, and the cost of any materials used in connection with such call, and for salaries and other compensation and traveling and maintenance expense of the assisting forces furnished during the time they shall not be performing their duties for the assisting municipality/entity, shall be a charge upon the municipality which issued the call for assistance. This paragraph shall not apply to the case of damage or expense to fire apparatus or equipment which occurred while responding to a request for assistance or returning from the scene upon completing the assistance and while the apparatus or equipment was not involved in the emergency operation, and which was caused by:

1. The act or omission of a fireman in the performance of his duties who is a member of the assisting force which suffered the damage; or
2. The act or omission of a third party or through an instrumentality not connected with the actual emergency operation.

While responding to a call for assistance, the municipality or entity shall be liable for the negligence of firemen of that municipality or entity occurring in the performance of their duties in the same manner and to the same extent as if such negligence occurred in the performance of their duties within the area regularly served and protected by said unit.

Any such claim for loss, damage, expense or cost shall not be allowed unless within 60 days after the same shall have been sustained, a written notice of such claim, under oath, itemizing such loss or expense is served by mail upon the fiscal officer of the municipality/entity which requested assistance.

B. Liability for workers' compensation for fire fighters involved in a cross border situation remains with the fire fighters' home fire company.

2) Procedure

Agencies will operate according to the standard operating procedures of individual fire agencies.

APPENDIX F

ACTION BY SOCIAL SERVICES DEPARTMENTS

GENERAL

1. In any type of disaster that invokes an international response, there will be a need to house, feed, and provide medical and support services to a large number of people. In addition there will be a need to register displaced persons, reunite separated persons within the disaster area and provide information and respond to inquiries from outside the disaster area.

NOTE: EACH OF THE DEPARTMENTS AND AGENCIES HAVING RESPONSIBILITIES UNDER THIS PROCEDURE MAINTAIN INDIVIDUAL OPERATING PLANS. IN ALL CIRCUMSTANCES, THE OPERATING PROCEDURE OF THE REQUESTING AUTHORITY WILL PREVAIL.

PROCEDURE

2. In the event of a disaster, the services of Social Services staff, on either side of the border, will be activated through a call-out, originating as provided for in their respective Standard Operating Procedure.
3. Requesting authority:
 - a. The requesting authority will establish an assembly point as close as possible to an international border crossing point. This location should be on a main highway or an easily accessed secondary highway that is well marked and easy to locate.
 - b. It will be the responsibility of the responding agency to assemble its personnel at a site of its choice and to provide transportation from that site to the assembly point as designated by the requesting authority.
 - c. The requesting authority will provide sufficient space to receive and, if necessary, store any transportation used by the responding authority in travelling to the assembly area.
 - d. The requesting authority will provide transportation to move the responding personnel to the respective work areas.
 - e. During the time that the responding personnel are on the site, it will be the responsibility of the requesting authority to provide shelter, food, equipment, and any medical needs to the responding personnel.
 - f. The responding authority will arrange for all necessary relief for any and all responding personnel.
 - g. The requesting authority will arrange to register and provide identification of responding personnel and will keep this information updated and available at the Emergency Operations Center.
 - h. Upon receipt of an official declaration that the emergency situation has been terminated, the requesting authority will ensure that all personnel are so advised and will provide the

necessary transportation to return the responding personnel to either (1) their own transportation, or (2) to a satisfactory drop-off spot in the responding agency's area.

- i. The responding agency will be attached to and will work under the command of the requesting authority.

GENERAL

It is generally understood that the responding authority will be asked to provide personnel to assist in the following areas:

- (i) registration
- (ii) care and supervision of evacuees
- (iii) assistance at emergency welfare centers in areas of counseling; grief counseling; general inquiries; location of persons; reconciliation of families; supervision of children; etc.

APPENDIX G

CROSS BORDER EMERGENCY MEDICAL SERVICES RESPONSE SEQUENCE

- Report is made.
- Confirm the incident.
- Activate the Response Plan; request that neighboring municipality be placed on standby alert.
- Place hospital on standby.
- Request status of available resources.
- Assume Emergency Medical Services command and report to Unified Command Post.
- Decon Sector established.
- Staging Sector established.
- Triage Sector established.
- Establish hospital communications.
- Obtain initial hospital capability/bed inventory from hospitals.
- Upgrade neighboring municipality from standby to operational mode if mutual aid will be necessary, and advise the municipality of resource needs.
- Establish Treatment Sector.
- Develop listing of receiving hospitals and identify access routes.
- Begin transportation of patients from Transportation Sector by priority to appropriate hospital. (Patients being transported across the border will be double tagged per guidelines.)
- Provide appropriate pre-hospital care prior to transport if treatment sector has been established.
- Continue to monitor hospital candidates.
- Advise Medical Examiners and mortuaries if necessary.

APPENDIX G
(Continued)

GUIDELINES FOR AMBULANCES
REQUESTED TO PROVIDE CROSS BORDER ASSISTANCE

When requested to provide assistance to Emergency Medical Services across the border for major incident/disaster situations, etc., all ambulance crews will follow these guidelines:

- 1) Report to meeting area as directed by dispatch (usually a border crossing).
- 2) Police will meet and escort vehicles to site.
- 3) Maintain communications with dispatch on assigned channel.
- 4) On arrival at site, report to staging area as directed or to site commander.
- 5) Advise EMS command whether crew is Advanced Life Support (ALS) or Mobile Intensive Care Unit (MICU).
- 6) Provide appropriate pre-hospital care prior to transport if treatment sector has been established as directed by Emergency Medical Services command.
- 7) Transportation of patients from transportation sector by priority to appropriate hospital as directed. Patients being transported cross border will be double tagged as per guidelines.
- 8) Return to site after delivering patients to appropriate hospital.

Clear and return to home base when directed by dispatch.

APPENDIX I

DEFINITIONS

Area Contingency Plan: As defined by sections 311(a) (19) and (j) (4) of CWA, as amended by OPA, means the plan prepared by an Area Committee, that in conjunction with the NCP, shall address the removal of a discharge including a worst-case discharge and the mitigation or prevention of a substantial threat of such a discharge from a vessel, offshore facility, or on-shore facility operating in or near an area designated by the President.

Bulk: Material that is stored or transported in a loose, unpacked, liquid, powder, or granular form capable of being conveyed by a pipe, bucket, chute or belt system.

Comite Local Ayuda de Mutua (CLAM): A group of local representatives representing Mexico industry and agencies who assist in the preparation of spill response plans on the Mexico Border.

Cleanup: For the purposes of this document, cleanup refers to the removal and/or treatment of oil, hazardous substances, and/or the waste or contaminated materials generated by the incident. Cleanup includes restoration of the site and its natural resources.

Coastal Waters: The waters of the coastal zone (except for the Great Lakes and specified ports and harbors on inland rivers). Precise boundaries are identified in USCG/EPA agreements, Federal Regional Contingency Plans and Area Contingency Plans.

Decontamination: The removal of hazardous substances from personnel and their equipment necessary to prevent adverse health effects and secondary contamination.

Discharge: Any spilling, leaking, pumping, pouring, emitting, emptying or dumping.

Dispersant: Those chemical agents that emulsify, disperse, or solubilize oil into the water column or induce the surface spreading of oil slicks to facilitate dispersal of the oil into the water column.

Drinking Water Supply: As defined by section 101(7) of CERCLA, means any raw or finished water source that is or may be used by a public water system (as defined in the Safe Drinking Water Act) or as drinking water by one or more individuals.

Environmentally Sensitive Area: An especially delicate or sensitive natural resource that requires protection in the event of a pollution incident.

Ground Water: As defined by section 101(12) of CERCLA, means water in a saturated zone or stratum beneath the surface of land or water.

Hazardous Material: Any non-radioactive solid, liquid, or gaseous substance which, when uncontrolled, may be harmful to humans, animals, or the environment: including, but not limited to, substances otherwise defined as hazardous wastes, dangerous wastes, extremely hazardous wastes, oil or pollutants.

Incident: Any event that results in a discharge of oil or hazardous materials. Action by emergency service personnel may be required to prevent or minimize loss of life or damage to property and/or natural resources.

Inland Waters: Those waters of the United States in the inland zone, waters of the Great Lakes, Lake Champlain, and specified ports and harbors on inland rivers.

Inland Zone: The environment inland of the coastal zone excluding the Great Lakes, Lake Champlain, and the specified ports and harbors on inland rivers. The term inland zone delineates an area of Federal responsibilities for response actions. Precise boundaries are determined by EPA/USCG agreements and identified in Federal Regional Contingency Plans.

Local Emergency Planning Committee (LEPC): A group of local representatives appointed by the State Emergency Response Commission (SERC) to prepare local oil and hazardous materials spill response plans as per the mandates of the Superfund Amendments and Reauthorization Act, Title III.

Natural Resources: Land, fish, wildlife, biota, air, water, ground water, drinking water supplies, and other such resources belonging to, managed by, held in trust by, appertaining to, or otherwise controlled by municipal, state, or federal governments or private parties.

On-Scene Coordinator (OSC): The government official at an incident scene responsible for coordinating response activities.

Primary Response Contractor or Contractors: An individual, company, or cooperative that has contracted directly with the plan holder to provide equipment and/or personnel for the containment or cleanup of spilled oil or hazardous material.

Regional Response Team (RRT): The federal response organization (consisting of representatives from selected federal and state agencies) which acts as a regional body responsible for planning and preparedness before an oil spill occurs and for providing advice to the OSC in the event of a major or substantial spill.

State Emergency Response Commission (SERC): A group of officials appointed by the state governor to implement the provisions of Title III of the Federal Superfund Amendments and Reauthorization Act of 1986 (SARA). The SERC approves the State Oil and Hazardous Substances Discharge Prevention and Contingency Plan and Local Emergency Response Plans.
