General Information

A. What Should I Consider as I Prepare My Comments for EPA?

1. **Submitting CBI.** Do not submit this information to EPA through <http://www.regulations.gov> or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD-ROM that you mail to EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. **Tips for Preparing Your Comments.** When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying

information (subject heading, **Federal Register** date and page number).

- Follow directions—The agency may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.

- Explain why you agree or disagree; suggest alternatives and substitute language for your requested changes.

- Describe any assumptions and provide any technical information and/or data that you used.

- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.

- Provide specific examples to illustrate your concerns, and suggest alternatives.

- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.

- Make sure to submit your comments by the comment period deadline identified.

SUPPLEMENTARY INFORMATION: Under section 108(a) of the Clean Air Act (CAA), the Administrator identifies and lists certain pollutants which "cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare." The EPA then issues air quality criteria for listed pollutants, which are commonly referred to as "criteria pollutants." The air quality criteria are to "accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air, in varying quantities." Under section 109 of the CAA, EPA establishes NAAQS for each listed pollutant, with the NAAQS based on the air quality criteria. Section 109(d) of the CAA requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria.

Air quality criteria have been established for the sulfur oxides (SO_x) and NAAQS have been established for sulfur dioxide (SO₂), an indicator for SO_x. Presently, EPA is reviewing the air quality criteria for SO_x and the NAAQS for SO₂. As part of its review of the NAAQS, EPA is preparing an assessment of exposures and characterization of health risks associated with ambient SO₂. A draft

plan describing the proposed approaches to assessing exposures and characterizing risks is described in the draft document, *Sulfur Dioxide Health Assessment Plan: Scope and Methods for Exposure and Risk Assessment*. This document was released for public review and comment in November 2007 and was the subject of a consultation with the Clean Air Scientific Advisory Committee (CASAC) on December 5 and 6, 2007. Comments received from that consultation have been considered in developing the draft risk and exposure assessment document being released at this time.

The draft document being released at this time conveys the approach taken to assess exposures to ambient SO₂ and to characterize associated health risks, as well as to present the results of those assessments. This draft document will be available online at: http://www.epa.gov/ttn/naaqs/standards/so2/s_so2_cr_rea.html.

The EPA is soliciting advice and recommendations from the CASAC by means of a review on the draft document at an upcoming public meeting of the CASAC scheduled for July 30–31, 2008 in Research Triangle Park, NC. Following the CASAC meeting, EPA will consider comments received from the CASAC and the public in preparing a second draft risk and exposure assessment report. The release of the second draft report will be followed by another CASAC meeting which will be announced in a future **Federal Register** notice and ultimately EPA will release a final risk and exposure assessment document taking into consideration comments from the CASAC and public.
