

APPENDIX D: Processed Modal Aircraft Inventories

The following modal inventories show all of the unique aircraft types currently modeled within SAGE. The modal categories are provided below:

Ground: Ground-based movements including taxi times and delays

<=3000: Airborne movements at or below 3000 ft above AFE

>3000: Movements above 3000 ft

Total: All movements

Based on these definitions, LTO and cruise results are derived as:

LTO = “Ground” + “<=3000”

Cruise = “>3000”
