

2005 California Almond Acreage Report

Released: May 1, 2006
12:00 p.m. PDT

USDA, National Agricultural Statistics Service,
California Field Office

RESULTS

California's 2005 almond acreage is estimated at 680,000 acres, a 6 percent increase from 2004's acreage of 640,000. Bearing acreage is 580,000 acres and non-bearing is 100,000 acres.

Nonpareil continues to be the leading variety, followed by Carmel and Butte. Butte, Monterey, and Nonpareil showed significant acreage increases.

Kern, Merced, Stanislaus, and Fresno are the leading counties. These four counties have about 63 percent of the acreage.

OBJECTIVES

The California Field Office of the USDA's National Agricultural Statistics Service (NASS) conducts an annual acreage survey of California almond growers. The purpose of this survey is to provide annual almond acreage with information on new plantings and removals. It is a continuation of a long series of industry funded almond acreage surveys.

Users are cautioned that this report consists of two parts:

- ▶ Estimated almond acreage -- bearing, non-bearing, and total.
- ▶ Detailed data by variety, year planted, and county -- as voluntarily reported by almond growers and maintained in the NASS data base.

With perfect information, the estimated almond acreage and the detailed data would be the same. However, differences exist for the following reasons:

- ▶ A voluntary survey of approximately 6,000 almond growers is unlikely to ever attain 100 percent completeness.
- ▶ It is difficult for USDA, NASS to detect growers that are planting almonds for the first time.
- ▶ The detailed data reflects tree removals from more than 10,000 acres (mostly planted in the 1970's and 1980's) during the past twelve months. Of this number, a significant amount of acreage was harvested in 2005 prior to being pushed out, and that acreage has already been removed from the detailed data.

PROCEDURES

The major source of the almond detailed data was a questionnaire mailed to all almond growers included on the NASS data base. The mailing was made in late September 2005. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections; new growers were mailed a blank questionnaire. Growers were given six weeks to respond by mail. A telephone follow-up was then undertaken. Field personnel personally visited large growers who did not respond by mail or telephone.

To arrive at the estimated almond acreage, the NASS almond acreage data base was compared with pesticide application data maintained by County Agricultural Commissioners and the California Department of Pesticide Regulation.

ACKNOWLEDGMENTS

The USDA, NASS, California Field Office sincerely appreciates the many farm operators, owners, and management firms providing the information. Special thanks is due the Almond Board of California for funding.

Appreciation is due the following office staff for the hundreds of hours spent collecting and processing survey information: Kelly Albelo, Carol Cole, Peggy Gibson, Pearl Gonzalez, Ann Jehn, Jeff Olson, Lupe Oropeza, Cordia Weems, and Sheryl Zazzi.
