

# SUMMARY OF COUNTY AGRICULTURAL COMMISSIONERS' REPORTS

GROSS VALUES BY COMMODITY GROUPS -- CALIFORNIA 1991-1992

## 1992 SUMMARY

California's counties reported a three percent increase in the value of their agricultural production in 1992. In spite of the drought, the value of agricultural production reported by the County Agricultural Commissioners in their annual crop reports gained modestly. When compared to the national economy as a whole the improvement parallels the increase in gross national product (+2.6%). California's agriculture held its own against the major pressures of the drought and the recession.

### Notable Changes in County Rankings and Percentages of the State Total:

Milk	-- Tulare increased its lead
All Grapes	-- Fresno gained and Napa declined
Cattle and Calves	-- Tulare and Imperial increased, all others declined
Nursery Products	-- San Diego increased its lead by one percent
Cotton	-- Fresno has one-third of the state total
Lettuce	-- Monterey increased its lead by ten percent, now has five-eighths of the state total
Oranges	-- Tulare revived from the freeze, now has fifty percent of the total
Flowers and Foliage	-- Monterey increased its share
Strawberries	-- Monterey has over one-third of the state total
Processing Tomatoes	-- Fresno has over one-third of the state total
Broccoli	-- Continues to climb with Monterey having three-fifths of the state total
Turkeys	-- Lower prices lowered rank from 13th to 20th
Plums	-- Low prices cut rank from 24th to 33rd
Cherries	-- San Joaquin County has 75 percent of state total
Garlic	-- Fresno has half of the state total

## NOTES TO THE AGRICULTURAL COMMISSIONER DATA

The gross value of production published in this report includes all farm production whether sold into usual marketing channels or used on the farm where produced. Values placed on pasture and range feed are included, and fresh fruit and vegetable crop values are based on the free on board (f.o.b.) packed price. Values are recorded for all products grown during the calendar year regardless of when they are marketed. The County Agricultural Commissioners' Reports also provide statistics on a broader range of commodities than estimates prepared by other agencies.

Because of these concepts, the State total for gross dollar values summarized here differs from the cash receipts to farmers estimated by the California Agricultural Statistics Service. The larger total value reported by the Agricultural Commissioners results from the different definitions that are used in estimating total value of production rather than cash receipts to producers.

Some counties are now including timber as a part of their crop report, following the pattern set by the County Agricultural Commissioners' Association. Since it is not comparable to earlier county summaries, this has not been made a part of the main tables of this summary. The total value reported by the counties including timber is 4.3 percent greater than the \$21.8 billion recorded on page 5 in this bulletin and totals with and without timber are shown on page 1.

### Top Ten Crops (Pages 10-12)

These are reported as listed in the crop reports. If no ranking was published, the county is not included in this table.

## COUNTY AGRICULTURAL COMMISSIONER REPORTS

Copies of individual County Agricultural Commissioner Reports may be obtained directly by request from the offices shown in the back of this summary.
