Fax: (916) 498-5186

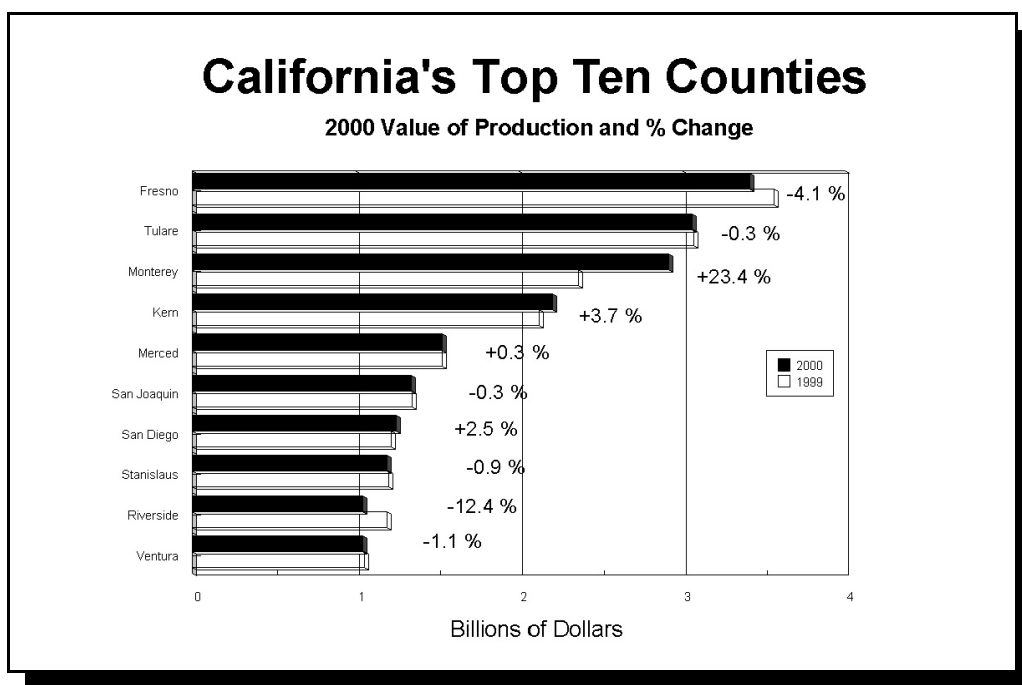

August 2001

Summary

California's counties reported an increase of 2.4 percent in the value of their agricultural production for 2000. Ten counties reported a value of production in excess of 1.00 billion dollars. Fresno County continues to lead all counties with a production value of 3.41 billion dollars, a decrease of 4.1 percent from last year's total. Tulare County was second in value of production. Monterey agricultural production increased 23 percent, due primarily to sharply higher vegetable values.

Notable Changes in County Ranks and State Totals:

Grapes, All	-- Fresno is number one with 17 percent of the total
Milk	-- Tulare increases their lead
Nursery Products	-- San Diego leads with 16 percent of the total
Cattle and Calves	-- Tulare is number one and growing
Lettuce	-- Monterey leads with more than five of every ten dollars
Cotton	-- Fresno has one-third of the total
Oranges	-- Tulare is first with a little more than half of the total
Flowers and Foliage	-- San Diego has more than half of the total
Almonds	-- Kern is number one followed by Stanislaus and Fresno
Strawberries	-- Monterey captures the lead from Ventura
Hay, Alfalfa	-- Imperial is number one with 17 percent
Chickens	-- Merced leads with Stanislaus in second
Rice (Excluding Seed)	-- Colusa is number one followed by Sutter
Broccoli	-- Monterey is number one with more than half
Tomatoes, Processing	-- Fresno leads with more than 40 percent of the total

Notes to the Agricultural Commissioners' Data

The gross value of production published in this report includes all farm production, whether sold into usual marketing channels or used on the farm where it is produced. Values placed on pasture and range feed are included and fresh fruit and vegetable crop values are based on the Free-On-Board (F.O.B.) packed price. Values are recorded for all products grown during the calendar year, regardless of when they are marketed. The County Agricultural Commissioners' Reports also provide statistics on a broader range of commodities than estimates prepared by other agencies.

Because of these concepts, the State total for gross dollar values summarized in this report differs from the cash receipts to farmers estimated by the California Agricultural Statistics Service. The larger total value reported by the Agricultural Commissioners results from the different definitions that are used in estimating total value of production rather than cash receipts to producers.

Some counties are now including timber as a part of their crop report, following the pattern set by the County Agricultural Commissioners' Association. Since it is not comparable to earlier county summaries, timber has not been made a part of the main tables of this summary. The total value reported by the counties including timber is 3 percent more than the \$29.3 billion recorded in the "County Gross Value of Agricultural Production, by Commodity Group, 1999-00" table on page 7, and the totals with and without timber are shown in the "County Rank by Gross Value of Agricultural Production, 1999-00" table on page 3.

County Agricultural Commissioners' Reports

Copies of individual County Agricultural Commissioner Reports may be requested or obtained directly from each County Agricultural Commissioner's Office. For your convenience, a listing is included at the end of this report.

1/ Totals vary slightly from totals published by counties due to classification differences between county and State reports. Reports for Alpine and Trinity counties were not available at publication so 1999 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2000 Grape Acreage Report; price and production data are from the 2000 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report. Numbers in parentheses are county rankings.

^{1/} Reports for Alpine and Trinity counties were not available at publication so 1999 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2000 Grape Acreage Report; price and production data are from the 2000 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report.

^{1/} Compiled from County Agricultural Commissioners' Reports for 2000. Reports for Alpine and Trinity counties were not available at publication so 1999 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2000 Grape Acreage Report; price and production data are from the 2000 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report.

^{2/} Includes trees, shrubs, vines, bedding plants, bulbs and turf not included in flowers and foliage.

^{3/} Includes cut flowers, potted plants, foliage plants and indoor decoratives.

^{1/} The data rankings were extracted from County Agricultural Commissioners' Reports where published. Those not ranked by the counties were ranked by the California Agricultural Statistics Service. Timber was omitted in rankings. Reports for Alpine and Trinity counties were not available at publication so 1999 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2000 Grape Acreage Report; price and production data are from the 2000 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report.
