Fax: (916) 498-5186

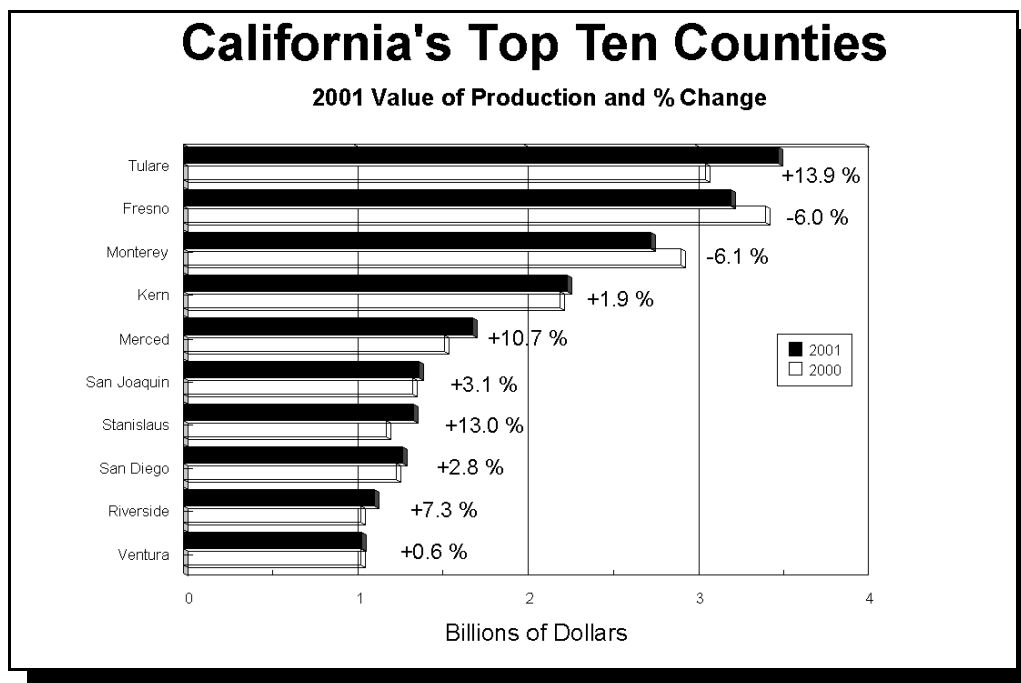

August 2002

Summary of County Agricultural Data

California's counties reported an increase of 1.5 percent in the value of their agricultural production for 2001. Eleven counties reported a value of production in excess of 1.00 billion dollars. Tulare County beat out Fresno County as the leading county with a production value of \$3.49 billion, an increase of 14 percent from last year's total. A large share of Tulare's receipts is from milk and cream, which showed a big jump in 2001. Fresno County was second in value of production with \$3.22 billion, down 6 percent from last year. Much of the decrease is attributed to the lower value for raisin-type grapes. Monterey agricultural production also decreased 6 percent, to \$2.75 billion.

Notable Changes in County Ranks and State Totals:

Milk and Cream	-- Tulare increases their lead to 25 percent of the total
Grapes, All	-- Kern takes over number one, Fresno drops to fifth
Nursery Products	-- San Diego leads with 18 percent of the total
Cattle and Calves	-- Tulare is number one and growing
Lettuce	-- Monterey leads with more than five of every ten dollars
Oranges	-- Tulare is first with a little more than half the total
Hay, Alfalfa	-- Imperial is number one with 16 percent
Cotton	-- Fresno has over one-third of the total
Strawberries	-- Monterey captures one-third of the total
Almonds	-- Kern is number one followed by Fresno and Stanislaus
Flowers and Foliage	-- San Diego has more than half the total
Rice (Excluding Seed)	-- Colusa is number one followed by Glenn
Broccoli	-- Monterey is number one with more than half
Salad Greens	-- Monterey dominates with 97 percent of the total
Tomatoes, Processing	-- Fresno leads with 38 percent of the total

Notes to the Agricultural Commissioners' Data

The gross value of production published in this report includes all farm production, whether sold into usual marketing channels or used on the farm where it is produced. Values placed on pasture and range feed are included and fresh fruit and vegetable crop values are based on the Free-On-Board (F.O.B.) packed price. Values are recorded for all products grown during the calendar year, regardless of when they are marketed. The County Agricultural Commissioners' Reports also provide statistics on a broader range of commodities than estimates prepared by other agencies.

Because of these concepts, the State total for gross dollar values summarized in this report differs from the cash receipts to farmers estimated by the California Agricultural Statistics Service. The larger total value reported by the Agricultural Commissioners results from the different definitions used in estimating total value of production rather than cash receipts to producers.

Some counties are now including timber as a part of their crop report, following the pattern set by the County Agricultural Commissioners' Association. Since it is not comparable to earlier county summaries, timber has not been made a part of the main tables of this summary. The total value reported by the counties, including timber, is 2 percent more than the \$29.8 billion recorded in the "County Gross Value of Agricultural Production, by Commodity Group, 2000-01" table on page 7. The totals, with and without timber, are shown in the "County Rank by Gross Value of Agricultural Production, 2000-01" table on page 3.

California Timber Industry

California has more forest land than any state, except Alaska. Nearly two billion board feet (equivalent to 132,000 homes) of commercial lumber are produced from California's private and public timberlands each year, making the "Golden State" the third largest producer of wood products in the nation. California's abundant forests could provide nearly 100 percent of the state's demand for wood: 10.5 billion board feet were grown in 2001, while 9.20 billion board feet were consumed. Yet, just 25 percent of the state's needs are met with California timber due to regulations.

California's Leading Timber Counties, 2001

Timber Rank	County	Timber Volume (Thousand Bd. Ft.)	Total Agricultural Value (Including Timber)	Timber Value	Timber Percentage of Total Agricultural Value
1	Humboldt	358,225	300,299	190,569	63.5
2	Mendocino	117,596	184,124	52,437	28.5
3	Shasta	144,513	92,090	40,399	43.9

1/ Totals vary slightly from totals published by counties due to classification differences between county and State reports. Numbers in parentheses are county rankings.

2/ Reports for Alpine and Trinity counties were not available at publication so 2000 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2001 Grape Acreage Report; price and production data are from the 2001 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report.

^{1/} Reports for Alpine and Trinity counties were not available at publication so 2000 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2001 Grape Acreage Report; price and production data are from the 2001 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report.

^{1/} Compiled from County Agricultural Commissioners' Reports for 2001. Reports for Alpine and Trinity counties were not available at publication so 2000 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2001 Grape Acreage Report; price and production data are from the 2001 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report.

^{2/} Includes trees, shrubs, vines, bedding plants, bulbs and turf not included in flowers and foliage.

^{3/} Includes cut flowers, potted plants, foliage plants and indoor decoratives.

^{1/} The data rankings were extracted from County Agricultural Commissioners' Reports where published. Those not ranked by the counties were ranked by the California Agricultural Statistics Service. Timber was omitted in rankings. Reports for Alpine and Trinity counties were not available at publication so 2000 data were used for this report. Lake County was also not available at publication so the grape acreage data are from the 2001 Grape Acreage Report; price and production data are from the 2001 Grape Crush Report; pear and walnut data are from industry sources; all other data are from the 1997 Lake County Agricultural Commissioner's Report.
