Fruit Commodity Rank, Acreage, Production, and Value	3
Florida Citrus	4

NOVEMBER CROP COMMENTS

Fruit growers conducted cultural activities that included weed control, fungicide applications, and irrigation of trees and vines. The raisin grape harvest was virtually complete, with most areas reporting close to 100 percent of the crop in bins or being processed by month's end. Harvesting of dried-on-vine raisins continued in most districts. Late variety table grapes were harvested throughout the month. Varieties picked and packed included Crimson Seedless and Ruby Seedless. In many late season table grape vineyards, plastic tarps were in place for protection against rain damage. Wine and juice grape harvesting continued, but was nearing completion by month's end. Stone fruit harvest continued at a reduced pace through mid-October. Varieties picked and packed included Autumn Royal and September Snow peaches, Roysum and Angelo plums,

and September Red nectarines. Fall pruning commenced in many harvested stone fruit orchards. Harvest of Granny Smith, Pink Lady and Fuji apple varieties continued. Foothill and Wonderful pomegranates, Fuya and Hachiya persimmons, and Shinko Asian pears were harvested. Strawberries were harvested in the central coast counties. Vigorous growth continued in strawberry plantings with good bloom underway. Fields were irrigated and treated to control insect pests. The olive harvest continued throughout the month with Baronni, Sevillano and Ascallano the major varieties picked. Walnuts, almonds and pistachios were harvested, windrowed, and hauled to processors. Some harvested almond orchards were being pushed out. Irrigation and pest control activities continued in many orchards. Harvest of the 2001-02 Valencia orange crop continued to wind down. Much of the fruit was sent to processors for juice. Picking of early season Navel orange varieties began in some areas of the State by the end of October. Lemon harvesting commenced in the Fresno and Sanger districts. Picking and packing of Minneola tangerines began at the end of October. Chandler variety pummelos were harvested.

FRUIT AND NUT STATISTICS AT A GLANCE

Crop	Bearing	Acreage	Yield P	er Acre	Estimated	Production	Production	Next

For information on part-time jobs collecting agricultural data in your local area, please call 1-800-851-1127.

Based on quantity produced for crops and on quantity marketed for livestock and poultry products.

Based on value of quantity harvested for crops, value of quantity marketed for livestock, and value of quantity produced for poultry products.

Based on values published in the county agricultural commissioners' annual crop reports.

Share of U.S. production based on 1997 Census of Agriculture.

FLORIDA CITRUS

November was a variable month for weather in Florida. Temperatures ranged from the upper 30's to the 80's, with several cold nights in the 40's. Rainfall for the month arrived in four or five days and the rest of the time it was dry. Most citrus producing counties and weather recording stations showed just about average rainfall for November. Virtually all of the well-cared-for groves are in very good to excellent condition. There is very little new growth showing at this time due to the shorter days and cooler nights. All of the early and mid-season fruit are well colored on the trees and need very little de greening when going to the fresh markets. Harvesting crews got very busy early in November as all of the processors had opened.

Deliveries at the juice plants were averaging around one million boxes per day through the end of the month. Fresh fruit packing houses were also very active shipping Navels and other early oranges, white and colored grapefruit, and tangerines and tangelos. Growers and caretakers have been winterizing their groves. Some heaters have been placed in the colder locations. A few resets are being dirt banked for cold protection. Some late season fruits are being sprayed for fresh use. Many harvested groves in the southern areas are being hedged and topped. Dead trees are being pushed out and burned.

If you don't receive the Ag Census form by December 31, 2002, please make sure you are counted by calling our toll free number at 1-888-4AG-STAT or 1-888-424-7828.
