

**Safety Attribute Inspection (SAI) Data Collection Tool**  
**3.1.1 Passenger Handling (OP)**

**ELEMENT SUMMARY INFORMATION**

**Purpose of this Element** (certificate holder's responsibility):

- To provide a safe environment during passenger handling operations.

**Objective** (FAA oversight):

- To determine if the certificate holder's Passenger Handling process meets all applicable requirements of Title 14 of the Code of Federal Regulations (14 CFR) and FAA policies.
- To determine if the certificate holder's Passenger Handling process incorporates the safety attributes.
- To identify any shortfalls in the certificate holder's Passenger Handling process.

**Specific Instructions:**

- Intentionally left blank

**SUPPLEMENTAL INFORMATION**

### SAI Section 1 - Procedures Attribute

**Objective:** Procedures, instructions, and information are documented methods for accomplishing a process. The certificate holder's policies should establish their compliance posture. Policies may be stand-alone statements, or they may be imbedded within procedures, instructions, or information regarding a particular regulatory requirement. The questions in this section of the data collection tool (DCT) are designed to assist the inspector in determining if the certificate holder has documented or prescribed methods of accomplishing the process requirements that provide answers to the associated questions regarding who, what, when, where, and how. This section contains policy questions, procedural questions, and instructional or informational questions pertaining to various types of certificate holder requirements such as actions, prohibitions, or resources (i.e., personnel, facilities, equipment, technical data, etc.).

#### Tasks

	To meet this objective, the inspector must accomplish the following tasks:
1.	Review the information listed in the Supplemental Information section of this DCT.
2.	Review the duties and responsibilities for management and other personnel identified by the certificate holder who accomplish the Passenger Handling process.
3.	Review the certificate holder's Passenger Handling process to ensure it contains policies, procedures, instructions and information necessary for personnel to perform their duties and responsibilities with a high degree of safety.

#### Questions

	To meet this objective, the inspector must answer the following questions:	
1.	Does the certificate holder's Passenger Handling process meet the specific regulatory and FAA policy requirements:	
1.1.	Does the certificate holder's manual contain procedures to ensure that all passengers are orally briefed by the appropriate crewmember before each takeoff on the: <i>Related Design JTIs:</i> 1. Check that the Certificate Holder's manual system has procedures to insure that all passengers are orally briefed by a responsible crewmember and that those procedures are describe in its manual. <i>Sources:</i> 121.571(c) <i>Interfaces:</i> 2.1.2(AW); 2.1.2(OP); 3.1.2(OP); 3.1.3(OP); 4.2.4(OP) 2. Check that the Certificate Holder's manual system has procedures describing how oral briefings will be conducted. <i>Sources:</i> 121.571(c) <i>Interfaces:</i> 2.1.2(AW); 2.1.2(OP); 3.1.2(OP); 3.1.3(OP); 4.2.4(OP)	
1.1.1	Smoking requirements identified in 14 CFR part 121, section 121.571(a)(1)(i)?  SRRs: 121.571(a)(1)(i); 121.571(c) <i>Related Design JTIs:</i> 1. 1.46.	<p>Does the certificate holder's Passenger Handling process contain the approved applicable policies and procedures for allowing persons eligible under 14 CFR Section 121.547(a)(3) access to the flightdeck?</p> <p>SRRs: A.048b</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.47.	<p>Does the certificate holder's A048 operation specification describe the approved Cockpit Access Security System (CASS), Flight Deck Access restriction Program (FDAR), or CASS/FDAR program and identify where in the</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable

	manual the approved applicable policies and procedures are? SRRs: A.048b	
1.48.	Does the certificate holder s manual include the policies and procedures for verifying the identity and eligibility of a person requesting access to the flightdeck? SRRs: A.048c(1)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.49.	Does the certificate holder s Passenger Handling process contain approved procedures to ensure cabin occupants, other than non-ambulatory patients, are aided in recognizing emergency exits during an emergency evacuation to compensate for the shadows caused by the litters being in place, during aeromedical evacuation (AE) flights? SRRs: A.522f	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.50.	Does the certificate holder s Passenger Handling process include a Before Takeoff Passenger Briefing that describes the approved procedures for aiding ambulatory cabin occupants in recognizing emergency exits in shadows caused by litters during AE flights? SRRs: A.522f	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.51.	Does the certificate holder s Passenger Handling process contain instructions and information for medical crewmembers and flight attendants to carry flashlights for in-flight use to observe patients as necessary, during AE flights? SRRs: 121.135(a)(1); A.522f	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.52.	Does the certificate holder s Passenger Handling process contain coordination procedures used to ensure the safety of the Aeromedical evacuation Crewmembers (AECMs) who may need to attend to patients during flight (e.g., takeoff, cruise, and landing) when the fasten seatbelt sign has been illuminated, for flight attendants and AECMs? SRRs: A.522i	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.53.	Does the certificate holder s Passenger Handling process include instructions and information necessary for personnel to ensure that: SRRs: A.522i	
1.53.1	Instructions are given to AECMs regarding coordination procedures before the first and subsequent AE flights? SRRs: A.522i(1)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.53.2	AECMs are secured to litter stanchions (when possible) via a strap to reduce the risk of uncontrolled movement in the cabin? SRR: A522i(2) SRRs: A.522i(2)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.53.3	AECMs are seated whenever the seatbelt sign is illuminated, unless patients require immediate attention? SRRs: A.522i(3)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.53.4	Public address announcements are made to inform patients and AECMs to return to their seats and fasten belts or straps whenever seatbelt lights are illuminated? SRRs: A.522i(4)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.53.5	Smoking is prohibited on all AE flights? SRRs: A.522i(5)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.54.	Does the certificate holder s Passenger Handling process include instructions	

	and information for substituting an employee in the place of a flight crew member that is listed in the flight s flight release, and is required to be on duty in the cockpit all times during AE operations, include that any person who substitutes for a flight crewmember on duty in the cockpit is required to qualified by: SRRs: A.522j(1); A.522j(2)	
1.54.1	Being in the cockpit on duty at all times? SRRs: A.522j(2)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.54.2	Being knowledgeable of the emergency equipment and procedures necessary to coordinate with other crewmembers and ground crew, and be able to use the airplane radio communication equipment to call for fire and rescue services in an emergency? SRRs: A.522j(2)(a)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.54.3	Being knowledgeable of the aircraft electrical system including appropriate circuit breakers and properly manage the external power system? SRRs: A.522j(2)(b)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.54.4	Being knowledgeable of, and be able to accomplish fuel, oil, oxygen and other servicing procedures if servicing is permitted during substitute? SRRs: A.522j(2)(c)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.54.5	Being able to locate and operate emergency exits to include slide packs where used? SRRs: A.522j(2)(d); A.522j(4)(a)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.54.6	Being able to match fire extinguisher with class of fire and be able to operate each type of extinguisher? SRRs: A.522j(2)(d); A.522j(4)(a)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.54.7	Being knowledgeable in ground fire fighting procedures to include emergency evacuation? SRRs: A.522j(2)(d); A.522j(4)(a)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.55.	Does the certificate holder's Passenger Handling process comply with the guidance contained in FAA Order 8900.1, Volume 14, Chapter 2, Section 1?  <i>Related Design JTIs:</i> 1. Check that the certificate holder's manual has information and instructions to personnel on how they will handle passengers who do not comply with smoking prohibitions. <i>Sources:</i> FAA Order 8900.1, Vol 14, Ch 2, Sec 1, Para 14-155 <i>Interfaces:</i> 2.1.2(AW); 2.1.2(OP); 3.1.2(OP); 3.1.3(OP); 4.2.4(OP) 2. Check that the Certificate Holder's manual system has information and instructions to personnel on how passengers, who are not complying with the no-smoking rules, are to be approached using non-threatening methods/actions, and without the involvement of other passengers. <i>Sources:</i> FAA Order 8900.1, Vol 14, Ch 2, Sec 1, Para 14-155 <i>Interfaces:</i> 2.1.2(AW); 2.1.2(OP); 3.1.2(OP); 3.1.3(OP); 4.2.4(OP) 3. Check that the Certificate Holder's manual system has information and instructions to personnel on how non-compliant passengers who refuse to identify themselves will be handled by having the pilot-in-command notify the operator that there is a non-compliant passenger on board who refuses to identify himself/herself, and request that the operator	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable

	<p>have law enforcement officials meet the flight at the gate.  <i>Sources:</i> FAA Order 8900.1, Vol 14, Ch 2, Sec 1, Para 14-155  <i>Interfaces:</i> 2.1.2(AW); 2.1.2(OP); 3.1.2(OP); 3.1.3(OP); 4.2.4(OP)</p> <p>4. Check that the Certificate Holder's manual system has procedures to notify the flight crew if a passenger is suspected of smoking in the lavatory, of tampering with the lavatory smoke detector, or if the passenger refuses to extinguish a cigarette. The procedure should provide for identifying information to include: (1) Picture ID, (2) Address, (3) Physical description, (4) Seat number, (5) Boarding location, and (6) Names and addresses of any traveling companions. Operators must obtain the names and addresses of other passengers seated in the vicinity of the smoker as witnesses.  <i>Sources:</i> FAA Order 8900.1, Vol 14, Ch 2, Sec 1, Para 14-155  <i>Interfaces:</i> 2.1.2(AW); 2.1.2(OP); 3.1.2(OP); 3.1.3(OP); 4.2.4(OP)</p> <p>5. Check that the certificate holder's manual has information and instructions to personnel how before each takeoff, passengers are orally briefed on each of the following: EXIT SEATING: Include a reference to the passenger information cards. Include a request that passengers identify themselves if they do not meet the criteria or if they cannot or do not wish to perform the functions listed on the card. It is strongly recommended that carriers require crewmembers to provide a preflight personal briefing to each passenger at an exit seat. That briefing should clearly explain what each passenger should do in the event the exit might be needed and should refer each passenger to the information included on the passenger information card. FLOOR PROXIMITY EMERGENCY LIGHTING: Flight Attendants should inform passengers that emergency lights are located on or near the floor of the aircraft. ELECTRONIC DEVICES: Passengers should be informed of permissible times, conditions, and limitations when various portable electronic devices may be used. OXYGEN: Before reaching 25,000 feet, passengers should also be given instructions regarding the automatic appearance of the oxygen mask. In addition, passengers should be advised to don their own oxygen masks before assisting children with their masks. The announcement should include</p>	
--	--	--

	<p>information that the oxygen mask reservoir bags may not inflate, although sufficient oxygen is flowing into the bag. On smoking flights, passengers should be told to extinguish all cigarettes when the oxygen masks drop. SUPPLEMENTAL INFORMATION: Passengers should be briefed regarding passenger briefing cards and additional safety actions. Briefing should also contain instructions regarding passenger compliance with the following pretakeoff requirements: proper stowage of each passenger's carry-on baggage; securing each passenger's food and beverage tray in its stowed position; and stowing of any food, beverage, or tableware. LIFERAFTS AND SLIDE RAFTS: Flight attendants or other appropriate crewmembers must instruct passengers on liferaft and slide/raft retrieval from stowage and their preparation for use. INFORMATION ON CARDS: Flight attendants should emphasize that review of the passenger information cards is important. POSTTAKEOFF: Passengers should be briefed immediately before or after the "seatbelt" sign is turned off, that passengers should keep their seatbelts fastened while seated even if the "seatbelt" sign is turned off. The possibility of encountering unexpected turbulence should be emphasized to passengers. PRELANDING: A prelanding briefing is recommended and should include the following: seatbelts must be securely fastened; tray tables must be secured in their stowed position; seat backs must be in a fully upright position; food, beverages, or tableware must be picked up; and carry-on baggage and movie/video screens must be properly stowed for landing. POSTLANDING: A postlanding briefing is recommended. A flight attendant or other appropriate crewmember should advise passengers to remain seated with seatbelts fastened until the "seatbelt" sign has been turned off. This announcement should be accompanied by an explanation that this is for their own safety and the safety of those seated around them. Passengers should also be reminded concerning prohibitions against smoking. In addition, they should be reminded to use caution when opening the overhead bins. NOTE: Flight attendants should neither be assigned nor perform non safety-related duties during the safety briefings if those duties could obstruct the view of the passengers or distract them from listening.</p> <p><i>Sources:</i> AC 121-24 C 1. 	<p>airport it serves a copy of each procedure it establishes in regards to its authority to refuse transportation to a passenger needing assistance.</p> <p><i>Sources:</i> 121.135(b)(1); 121.586(d)</p> <p><i>Interfaces:</i> 4.2.6(OP)</p>	
3.	<p>Does the certificate holder's manual reference the appropriate Federal Aviation Regulations listed in the Supplemental Information section of this safety attribute inspection (SAI)?</p> <p>SRRs: 121.135(b)(3)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
4.	<p>Does the certificate holder's manual contain the duties and responsibilities for personnel who will accomplish the Passenger Handling process?</p> <p>SRRs: 121.135(b)(2)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
5.	<p>Does the certificate holder's manual include instructions and information for personnel to meet the requirements of the Passenger Handling process?</p> <p>SRRs: 121.135(a)(1)</p>	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

<b>SAI Section 1 - Procedures Attribute Drop-Down Menu</b>	
1.	No procedures, policy, instructions or information specified.
2.	Procedures or instructions and information do not identify (who, what, when, where, how).
3.	Procedures, policy or instructions and information do not comply with CFR.
4.	Procedures, policy or instructions and information do not comply with FAA policy and guidance.
5.	Procedures, policy or instructions and information do not comply with other documentation (e.g., manufacturer's data, Jeppesen's Charts, etc.).
6.	Procedures, policy or instructions and information unclear or incomplete.
7.	Documentation quality (e.g., unreadable or illegible).
8.	Procedures, policy or instructions and information inconsistent across Certificate Holder manuals (FOM - Flight Operations Manual to GMM - General Maintenance Manual, etc.).
9.	Procedures, policy or instructions and information inconsistent across media (e.g., paper, microfiche, electronic).
10.	Resource requirements incomplete (personnel, facilities, equipment, technical data).
11.	Other.

### SAI Section 2 - Controls Attribute

**Objective:** Controls are checks and restraints designed into a process to ensure a desired result. The questions in this section of the DCT are designed to assist the inspector in determining if checks and restraints are designed into the process to ensure the desired result is achieved. Controls should be written into the system to ensure that the most important policies, procedures, or instructions and information will be followed.

Controls may be in the form of administrative controls, which are secondary or supplemental written procedures. Like written procedures, administrative controls also need to provide answers to questions regarding who, what, when, where, and how. Controls may also be in the form of engineered controls, such as automated features or mechanical actions or devices (i.e., safety devices, warning devices, etc.).

#### Tasks

To meet this objective, the inspector must accomplish the following tasks:

1. Review the control questions below.
2. Review the certificate holder's policies, procedures, instructions, and information to gain an understanding of the controls that it has documented.

#### Questions

	To meet this objective, the inspector must answer the following questions:	
1.	Are the following controls built into the Passenger Handling process:	
1.1.	Is there a control or controls in place to ensure that no passengers are boarded who appear to be intoxicated?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.2.	Is there a control or controls in place to ensure that no passengers are boarded who appear to present a safety risk?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.3.	Is there a control or controls in place to ensure that passenger information cards, specific to the make and model of the aircraft, are available to all passengers?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.4.	Is there a control or controls in place to ensure that armed passengers have approval to carry weapons in accordance with the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.5.	Is there a control or controls in place to ensure that all persons with disabilities are boarded and provided transportation in accordance with the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.6.	Is there a control or controls in place to ensure that any passenger disturbances are handled in accordance with the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.7.	Is there a control or controls in place to ensure that approved child restraint systems are boarded and handled in accordance with the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.8.	Is there a control or controls in place to ensure that dangerous goods restrictions are observed?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

1.9.	Is there a control or controls in place to ensure that passengers receive all applicable required safety briefings in accordance with the certificate holder's design?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.10.	Is there a control or controls in place to ensure that all applicable requirements regarding the use of seatbelts and seatbelt/shoulder harnesses and passenger seatbacks are met?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.11.	Is there a control or controls in place to ensure that aircraft occupants comply with the certificate holder's restrictions regarding portable electronic devices?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.12.	Is there a control or controls in place to ensure that all applicable requirements regarding prohibition of smoking are observed?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.13.	Is there a control or controls in place to ensure that in an extended overwater operation, all applicable requirements regarding equipment and briefings are observed?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.14.	Is there a control or controls in place to ensure that passenger information signs and required informational placards are present and are used in accordance with the certificate holder's design?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
2.	Does the certificate holder have a documented method for assessing the impact of any changes made to the controls in the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

<b>SAI Section 2 - Controls Attribute Drop-Down Menu</b>	
1.	No controls specified.
2.	Documentation for the controls do not identify (who, what, when, where, how).
3.	Controls incomplete.
4.	Controls could be circumvented.
5.	Controls could be unenforceable.
6.	Resource requirements incomplete (personnel, facilities, equipment, technical data).
7.	Other.

### SAI Section 3 - Process Measurement Attribute

**Objective:** Process measurements are used by the certificate holder to measure and assess its processes, to identify and correct problems or potential problems, and to make improvements to the processes. The questions in this section of the DCT are designed to assist the inspector in determining if the certificate holder measures or assesses information to identify, analyze, and document potential problems with the process. Process measurements are a certificate holder's internal evaluation or auditing of the most important policies, procedures, or instructions and information associated with an element.

To prevent the duplication of work, process measurements are most commonly addressed through a combination of auditing features contained in both the certificate holder's safety program/internal evaluation program (for operations and cabin safety-related issues) and the auditing function of the Continuous Analysis and Surveillance System (for airworthiness or maintenance/inspection-related issues). The director of safety and the quality assurance department often work together to accomplish this function for the certificate holder. This approach requires amendment of the safety program/internal evaluation program audit forms or checklists and the Continuous Analysis and Surveillance System audit forms or checklists to include the specific process measurements for each element.

#### Tasks

	To meet this objective, the inspector must accomplish the following tasks:
1.	Review the process measurement questions below.
2.	Review the certificate holder's policies, procedures, instructions, and information to gain an understanding of the process measurements that it has documented.

#### Questions

	To meet this objective, the inspector must answer the following questions:	
1.	Does the certificate holder's Passenger Handling process include the following process measurements:	
1.1.	Is there a process measurement or process measurements that would identify if the certificate holder boarded passengers who appeared to be intoxicated?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.2.	Is there a process measurement or process measurements that would identify if the certificate holder boarded passengers who appeared to present a safety risk?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.3.	Is there a process measurement or process measurements that would identify if the certificate holder did not make available passenger information cards, specific to the make and model of the aircraft, to all passengers?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.4.	Is there a process measurement or process measurements that would identify if the certificate holder's procedures were not observed in the boarding of armed passengers?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.5.	Is there a process measurement or process measurements that would identify if the certificate holder failed to board and provide transportation to persons with disabilities in accordance with the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable

1.6.	Is there a process measurement or process measurements that would identify if any passenger disturbances were not handled in accordance with the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.7.	Is there a process measurement or process measurements that would identify if the certificate holder did not board and handle approved child restraint systems in accordance with the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.8.	Is there a process measurement or process measurements that would identify if the certificate holder boarded dangerous goods contrary to the certificate holder's procedures?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.9.	Is there a process measurement or process measurements that would identify if passengers did not receive all applicable required safety briefings in accordance with the certificate holder's design?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.10.	Is there a process measurement or process measurements that would identify if applicable requirements regarding the use of seatbelts and seatbelt/shoulder harnesses and passenger seatbacks were not met?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.11.	Is there a process measurement or process measurements that would identify if aircraft occupants did not comply with the certificate holder's restrictions regarding portable electronic devices?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.12.	Is there a process measurement or process measurements that would identify if applicable requirements regarding prohibition of smoking were not observed?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
1.13.	Is there a process measurement or process measurements that would identify, in an extended overwater operation, if applicable requirements regarding equipment and briefings were not observed?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
1.14.	Is there a process measurement or process measurements that would identify if passenger information signs and required informational placards were not present or not used in accordance with the certificate holder's design?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain <input type="checkbox"/> Not Applicable
2.	Is there a process measurement or process measurements that would reveal if the certificate holder's policy, procedures, instructions, and information were not followed?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
3.	Does the certificate holder document its process measurement results?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
4.	Does the certificate holder use of process measurement results to improve its programs?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
5.	Does the organization that conducts the process measurements have direct access to the person with responsibility for the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

<b>SAI Section 3 - Process Measurement Attribute Drop-Down Menu</b>
1. No process measurements specified.
2. Documentation for the process measurements does not identify (who, what, when, where, how).
3. Inability to identify negative findings.
4. No provisions for implementing corrective actions.
5. Ineffective follow-up to determine effectiveness of corrective actions.
6. Resources requirements (personnel, facilities, equipment, technical data).
7. Other.

### SAI Section 4 - Interfaces Attribute

**Objective:** Interfaces are used by the certificate holder to identify and manage the interactions between processes. The questions in this section of the DCT are designed to assist the inspector in determining whether or not interactions between the policies, procedures, or instructions and information associated with other independent processes within the certificate holder's organization are documented. Written policies, procedures, or instructions and information that are interrelated and located in different areas within the certificate holder's system must be consistent and complement each other. For the interfaces to be effectively managed, the certificate holder's system should identify and document the interfaces.

#### Tasks

	To meet this objective, the inspector must accomplish the following tasks:
1.	Review the interfaces associated with the Passenger Handling process that have been identified along with the individual questions in section 1, Procedures, of this DCT.
2.	Review the certificate holder's policies, procedures, instructions, and information to gain an understanding of the interfaces that it has documented.

#### Questions

	To meet this objective, the inspector must answer the following questions:	
	NOTE: The design job task items (JTIs) displayed with the questions in section 1, Procedures, of this DCT identify potential interfaces (by element number) for this element.	
1.	Does the certificate holder's system properly address the interfaces that are identified along with the questions in section 1, Procedures, of this DCT?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
2.	Does the certificate holder document a method for assessing the impact of any changes to the associated interfaces within the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

<b>SAI Section 4 - Interfaces Attribute Drop-Down Menu</b>	
1.	No interfaces specified.
2.	The following interfaces not identified within the Certificate Holder's manual system:
3.	Interfaces listed are inaccurate.
4.	Specific location of interfaces not identified within the manual system.
5.	Other

### SAI Section 5 - Management Responsibility & Authority Attributes

**Objective:** The questions in this section of the DCT address the responsibility and authority of the process. They are designed to assist the inspector in determining if there is a clearly identifiable, qualified, and knowledgeable person who is responsible for the process, is answerable for the quality of the process, and has the authority to establish and modify the process. (The person with the authority may or may not be the person with the responsibility.)

#### Tasks

	To meet this objective, the inspector must accomplish the following tasks:
1.	Identify the person who has overall responsibility for the Passenger Handling process.
2.	Identify the person who has overall authority for the Passenger Handling process.
3.	Review the duties and responsibilities of the person(s) documented in the certificate holder's manual.
4.	Review the appropriate organizational chart.

#### Questions

	To meet this objective, the inspector must answer the following questions:	
1.	Does the certificate clearly identify who is responsible for the quality of the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain Name/Title:
2.	Does the certificate holder clearly identify who has authority to establish and modify the policies, procedures, instructions, and information for the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain Name/Title:
3.	Does the certificate holder's manual include the duties and responsibilities of those who manage the work required by the Passenger Handling process? SRRs: 121.135(b)(2)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
4.	Does the certificate holder's manual include instructions and information for those who manage the work required by the Passenger Handling process? SRRs: 121.135(a)(1)	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
5.	Does the certificate holder clearly and completely document the responsibility for this position?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
6.	Does the certificate holder clearly and completely document the authority for this position?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
7.	Does the certificate holder clearly and completely document its qualification standards for the person having responsibility for the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
8.	Does the certificate holder clearly and completely document its qualification standards for the person having authority to establish and modify the certificate holder's policies, procedures, instructions, and information for the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain
9.	Does the certificate holder clearly and completely document the procedures for delegation of authority for the Passenger Handling process?	<input type="checkbox"/> Yes <input type="checkbox"/> No, Explain

<b>SAI Section 5 - Management Responsibility &amp; Authority Attributes Drop-Down Menu</b>	
1.	Not documented.
2.	Documentation unclear.
3.	Documentation incomplete.
4.	Other.
