Element Performance Inspection (EPI) Data Collection Tool 4.2.8 Simulators / Training Devices (OP)

ELEMENT SUMMARY INFORMATION

Purpose of this Element (certificate holder's responsibility):

• To ensure that simulators, training devices and training aids meet the requirements of the Air Carrier's FAA Approved Training Program.

Objective (FAA oversight):

- To determine the effectiveness of the certificate holder's procedures in meeting the desired output of the process.
- To determine if the certificate holder follows its procedures, controls, process measurements, and interfaces for the Simulators/Training Devices process.
- To determine if there were any changes in the personnel identified by the certificate holder as having responsibility and/or authority for the Simulators/Training Devices process.

Specific Instructions:

• To accomplish this EPI, the inspector should have a basic understanding of the simulator approval process. This EPI should be accomplished at various locations where the certificate holder trains its crewmembers.

EPI Section 1 - Performance Observables

Objective: The tasks and questions in this section of the data collection tool (DCT) are designed to assist the inspector in determining if the certificate holder follows its written procedures and controls and meets the established performance measures of the process. To accomplish this, questions have been generated to test both the outputs of the process as well as the process itself. Question 1 and its following subquestions are directed at the output(s) of the process, whereas questions 2-6, when answered, should be directed at the process itself.

	·	
Tasks		
	To meet this objective, the inspector must accomplish the following tasks:	
1.	Review the information listed in the Supplemental Information section of this DCT.	
2.	Review the certificate holder's policies, procedures, instructions and information for the Simulators/Training Devices process.	
3.	Review the last accomplished associated safety attribute inspection (SAI) for this element with emphasis on the controls, process measurements and interface attribute section responses.	
4.	Observe the certificate holders Simulators/Training Devices process to gain an understanding of the procedures, instructions, and information.	
5.	Discuss the Simulators/Training Devices process with the personnel (other than management) who perform the duties and responsibilities required by the process.	

Que	Questions				
	To meet this objective, the inspector must answer the following questions:				
1.	Determine whether the following performance measures were met:				
1.1.	Were usage of simulators and training devices consistent with authorizations and approvals? Related Performance JTIs:	☐ Yes ☐ No, Explain			
	 Check at the Training Center that the certificate holder has, for its use, a simulator located outside the United States that was approved for use by U.S. operator's to train or certificate airmen from the United States. <i>Sources:</i> Advisory Circular 120-40B, dated 07/29/91, Paragraph 7d. Check at the Training Center that the certificate holder has, for its use, an approved training device used for training of airmen within an operator's training program. <i>Sources:</i> Advisory Circular 120-45A, dated 02/05/92, Paragraph 5a. 				
1.2.	 Were the certificate holder's simulators and training devices maintained in accordance with the regulations? <i>Related Performance JTIs:</i> 1. Check at the Training Center that the certificate holder has for its use an airplane simulator, to be used for training, is given a daily functional preflight check before being used in accordance with certificate holder procedures. Sources: 121.135(b)(1); 121.407(a)(4) 2. Check at the Training Center that the certificate holder has for its use an airplane simulator, to be used for checks, is given a daily functional preflight check before being used in accordance with certificate holder procedures. 	☐ Yes ☐ No, Explain			

 Check at the Training Center that the certificate holder has for its use an airplane simulator, being used for training has a daily discrepancy log. <i>Sources</i>: 11.135(b)(1): 121.407(a)(5) Check at the Training Center that the certificate holder has for its use an airplane simulator that is being used for checks has a daily discrepancy log. <i>Sources</i>: 121.135(b)(1): 121.407(a)(5) Check at the Training Center that the certificate holder's instructors enter daily discrepancies in the discrepancy log at the end of each training flight in accordance with certificate holder procedures. <i>Sources</i>: 121.135(b)(1): 121.407(a)(5) Check at the Training Center that the certificate holder's check airmen enter daily discrepancies in the discrepancy log at the end of each check in accordance with certificate holder procedures. <i>Sources</i>: 121.135(b)(1): 121.407(a)(5) Check at the Training Center that a ground training device with varying levels of sophistication, used for systems integration training, was individually evaluated by the Principal Operations Inspector. <i>Sources</i>: AA Order 8900.1, Vol 3, Ch 19, Sec 4, Para 3-1179 Check at the Training Center that the certificate holder has, for its use, a simulator that was evaluated by the Abrinoal Simulator Has, for its use, an approved simulator(s) used for training or certification of airmen within an operator's training Orner that the certificate holder has, for its use, an approved simulator(s) used for training or certification for use within an operator's training Center that the certificate holder has, for its use, an simulator that reaining Center that the certificate holder has, for its use, an simulator straining Orner that the certificate holder has, for its use, a simulator straining Center that the certificate holder has, for its use, a simulator straining Center that the certificate holder has, for its use, a simulator subtory Circular 120-408, dated 07/29/91, Paragraph 7c. 1.5.	instead	ne certificate holder use an airplane simulator approved under this section I of the airplane to satisfy the pilot flight training requirements prescribed in tificate holder's approved low-altitude windshear flight training program?	☐ Yes ☐ No, Explain ☐ Not Applicable

	Related Performance JTIs:	
	1. Check at the Training Center that the certificate holder has, for its use, an airplane simulator approved under this section and is used instead of the airplane to satisfy the pilot flight training requirements, prescribed in the certificate holder's approved low-altitude windshear flight training program, in accordance, with the certificate holder's procedures. <i>Sources:</i> 121.135(b)(1); 121.407(d)	
2.	Were the certificate holder's policies, procedures, instructions and information for the Simulators/Training Devices process followed?	☐ Yes ☐ No, Explain
3.	Were the Simulators/Training Devices process controls followed?	☐ Yes ☐ No, Explain
4.	Did the records for the Simulators/Training Devices process comply with the instructions provided by the certificate holder?	☐ Yes ☐ No, Explain
5.	Were the process measurements for the Simulators/Training Devices process effective in identifying problems or potential problems and providing corrective action for them?	☐ Yes ☐ No, Explain
6.	Did personnel properly handle the associated interfaces by complying with other written policies, procedures, instructions and information that are related to this element?	☐ Yes ☐ No, Explain

	EPI Section 2 - Management Responsibility & Authority Observables			
desig knov has	Objective: The questions in this section address the responsibility and authority of the process. They are designed to assist the inspector in determining if there is a clearly identifiable, qualified, and knowledgeable person who is responsible for the process, is answerable for the quality of the process, and has the authority to establish and modify the process. (The person with the authority may or may not be the person with the responsibility.)			
Tas	ks			
	To meet this objective, the inspector must accomplish the following tasks:			
	NOTE: If no personnel or major program changes (as defined by the Principal Inspector(PI)) affecting the responsibility or authority attributes for this element have occurred since the last SAI and/or EPI was accomplished, then do not perform tasks 3-6. Answer questions 1 and 2, below, and provide the name/title.			
1.	Identify the person who has overall responsibility for the Simulators/Training Devices process.			
2.	Identify the person who has overall authority for the Simulators/Training Devices process.			
3.	Review the duties and responsibilities for those who manage the Simulators/Training Devices process.			
4.	Review the appropriate organizational chart.			
5.	Discuss the Simulators/Training Devices process with the management personnel identified in tasks 1 and 2.			
6.	Evaluate the qualifications and work experience of the management personnel identified in tasks 1 and 2.			

Que	Questions				
	To meet this objective, the inspector must answer the following questions:				
1.	Is there a clearly identified person who is responsible for the quality of the Simulators/Training Devices process?	☐ Yes ☐ No, Explain Name/Title:			
2.	Is there a clearly identified person who has authority to establish and modify the certificate holder's policies, procedures, instructions, and information for the Simulators/Training Devices process?	☐ Yes ☐ No, Explain Name/Title:			
3.	Does the responsible person know that he/she has responsibility for the Simulators/Training Devices process?	☐ Yes ☐ No, Explain ☐ No Change			
4.	Does the person with authority know that he/she has authority for the Simulators/Training Devices process?	☐ Yes ☐ No, Explain ☐ No Change			
5.	Does the person with responsibility for the Simulators/Training Devices process meet the qualification standards?	☐ Yes ☐ No, Explain ☐ No Change			
6.	Does the person with authority to establish and modify the Simulators/Training	Yes			

E.

	Devices process meet the qualification standards?	☐ No, Explain☐ No Change
7.	Does the person with responsibility understand the controls, process measurements, and interfaces associated with the Simulators/Training Devices process?	☐ Yes ☐ No, Explain ☐ No Change
8.	Does the person with authority understand the controls, process measurements, and interfaces associated with the Simulators/Training Devices process?	☐ Yes ☐ No, Explain ☐ No Change
9.	Does the responsible person know who has authority to establish and modify the Simulators/Training Devices process?	☐ Yes ☐ No, Explain ☐ No Change
10.	Does the individual with authority know who has the responsibility for the Simulators/Training Devices process?	☐ Yes ☐ No, Explain ☐ No Change

	EPI Section 2 - Management Responsibility & Authority Observables Drop-Down Menu
1.	Assignment of responsibility.
2.	Assignment of authority.
3.	Does not understand procedures, policies or instructions and information.
4.	Does not understand controls.
5.	Does not understand process measurements.
6.	Does not understand interfaces.
7.	Span of control.
8.	Position vacant.
9.	Other.
