The Commission strongly encourages electronic filings. See 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site <http://www.ferc.gov> under the "e-Filing" link.

l. *Amendment Application:* PGE proposes to: (i) Extend the term of the license from November 16, 2004, to November 16, 2017; (ii) continue generation until removal of the Little Sandy dam in 2008; (iii) implement a program of geomorphological and water quality monitoring continuing until Marmot dam removal; (iv) continue operation of the fish ladder and sorting facility at Marmot dam until Marmot dam removal; and (v) modify the operation of the diversion canal at Marmot dam to provide protection of threatened fish species from November 2004 until November 2007.

Surrender Application: The Project works include: Marmot dam, located at River Mile (RM) 30 on the Sandy River; a 3.1-mile-long series of canals and tunnels leading from Marmot dam to the Little Sandy River just upstream of the Little Sandy diversion dam; the Little Sandy diversion dam, located at RM 1.7 on the Little Sandy River; a 2.8-mile-long box flume leading from the Little Sandy diversion dam to the manmade forebay, Roslyn Lake; two 1,200 foot penstocks; and a powerhouse containing four generators with a total capacity of 22 megawatts. The powerhouse discharges to the Bull Run River 1.5 miles above its confluence with the Sandy River at RM 18.4.

PGE proposes the complete removal of both Marmot and the Little Sandy diversion dams, starting in 2007, along with the dismantling of their associated water conveyance structures. In addition, Roslyn Lake would be drained, the powerhouse generating equipment would be disabled, and the powerhouse structure would be demolished. All PGE-owned lands within the existing project boundary would be conveyed to the Western Rivers Conservancy once the license is surrendered and the project is removed, and used to protect and conserve fish and wildlife habitat, public access, and recreation opportunities in the Sandy River Basin. Project water rights would be relinquished and would revert to instream use.

Settlement Agreement and Decommissioning Plan: PGE filed a settlement agreement concerning the removal of the project. The signatories include PGE, 10 federal, state, and local agencies, and 12 non-governmental organizations. The agreement includes a decommissioning plan consistent with the applications for amendment of license and surrender.

m. Copies of the applications and settlement agreement are available for review at the Commission in the Public Reference Room or may be viewed on the Commission's website at <http://www.ferc.gov>
