information regarding FSIS policies, procedures, regulations, Federal **Register** notices, FSIS public meetings, recalls, and any other types of information that could affect or would be of interest to our constituents and stakeholders. The constituent Listserv consists of industry, trade, and farm groups, consumer interest groups, allied health professionals, scientific professionals, and other individuals who have requested to be included. Through the Listserv and web page, FSIS is able to provide information to a much broader, more diverse audience.

For more information, contact the Congressional and Public Affairs Office at (202) 720-9113. To be added to the free e-mail subscription service (Listserv), go to the "Constituent Update" page on the FSIS Web site at http://www.fsis.usda.gov/oa/ update.htm. Click on the "Subscribe to the Constituent Update Listserv" link, then fill out and submit the form.

Done in Washington, DC, on November 8, 2002.

Dr. Garry L. McKee,

Administrator.

DEPARTMENT OF COMMERCE

Submission for OMB Review: **Comment Request**

DOC has submitted to the Office of Management and Budget (OMB) for Clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau. Title: Annual Capital Expenditures Survey.

Form Number(s): ACE-1(S), ACE-1(M), ACE-1(Long), ACE-2.

Agency Approval Number: 0607-0782.

Type of Request: Revision of a currently approved collection.

Burden: 145,000 hours.

Number of Respondents: 61,000.

Avg. Hours Per Response: 2 hours and 23 minutes.

Needs and Uses: Data on the amount of business expenditures for new plant and equipment and measures of the stock of existing facilities are critical to evaluate productivity growth, the ability of U.S. business to compete with foreign business, changes in industrial capacity, and measures of overall economic performance. The ACES is the current source of comprehensive statistics on business investment in buildings and

other structures, machinery, and equipment for private non-farm businesses in the United States.

The plan for the continued survey is a basic annual survey that collects fixed assets and depreciation, sales and receipts, and total capital expenditures for new and used structures and equipment separately, from employer enterprises. This collection is intended to represent the capital expenditure activity of all employer firms and provide comprehensive control estimates of total capital expenditures for structures and equipment by industry. A mail out/mail back survey form will be used to collect data. Employer companies will be mailed one of three forms based on their diversity of operations and number of industries with payroll. Major planned revisions from the previously approved collection are the elimination of the separate question on the amount of capitalized interest incurred during the year to produce or construct assets reported as capital expenditures; and, the addition of a request for data on capitalized costs of computer software developed or obtained for internal use.

The ACES is an integral part of the Federal Government statistical program to improve and supplement ongoing statistical programs. Federal Government agencies, including the Census Bureau, use the data to improve and supplement ongoing statistical programs.

Affected Public: Business or other forprofit, not-for-profit institutions.

Frequency: Annually.

Respondent's Obligation: Mandatory. Legal Authority: Title 13 U.S.C., Sections 182, 224, and 225.

OMB Desk Officer: Susan Schechter, (202) 395-5103.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, room 6625, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Susan Schechter, OMB Desk Officer either by fax (202) 395-7245) or e-mail (susan schechter@omb.eop.gov).

Dated: November 8, 2002.

Madeleine Clayton,

Management Analyst, Office of the Chief Information Officer.

DEPARTMENT OF COMMERCE

Submission for OMB Review; **Comment Request**

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau. Title: Quarterly Survey of Residential Alterations and Repairs.

Form Number(s): SORAR-705. Agency Approval Number: 0607-

Type of Request: Extension of a currently approved collection. *Burden:* 2,400 hours.

Number of Respondents: 2,400. Avg Hours Per Response: 15 minutes.

Needs and Uses: The U.S. Census Bureau is requesting an extension of the current approved collection for the Quarterly Survey of Residential Alterations and Repairs. The Census Bureau is responsible for preparing estimates of the expenditures for residential improvement and repairs. This segment of the construction industry amounted to over \$150 billion in 2000. While the majority of the data are gathered from the Consumer Expenditure Survey (OMB number 1220–0050), a portion of the data (nearly \$50 billion in 2000) are collected in this survey. The survey form is mailed quarterly to a sample of owners of rental or vacant residential properties. Since residential improvement and repairs are a large growing economic sector, any measure of the construction industry would be incomplete without the inclusion of these data.

The Census Bureau uses the information collected to publish improvement and repair expenditures for rental and vacant residential properties. Data on improvements and repairs to owner-occupied properties are collected in the Consumer Expenditures Survey. Combined published estimates are used by a variety of private businesses and trade associations for marketing studies, economic forecasts and assessments of the construction industry. They also provide all levels of Government with a tool to evaluate economic policy and measure progress towards established goals. For example, the Bureau of Economic Analysis (BEA) uses improvement statistics to develop the residential structures component of the gross private domestic investment in the national income and product

Affected Public: Individuals or households, business or other for-profit, State, local or tribal governments.
