NUCLEAR REGULATORY COMMISSION

[Docket No. 30-30097]

Dr. Iliia Ruiz Gandulla, Environmental Assessment and Final Finding of No Significant Impact; Exemption

The U. S. Nuclear Regulatory Commission is authorizing Iliia Ruiz Gandulla, M.D., License No. 52-24929-01, an exemption to 10 CFR 35.432, for 90 days to permit the licensee to continue the medical use of its strontium-90 eye applicator without determining the source output or activity based on a calibration performed as required by 10 CFR 35.432. During this period, the licensee shall use the activity value (corrected for decay) provided by the strontium-90 eye applicator brachytherapy 1988 calibration certificate for ophthalmic treatment.

Environmental Assessment

Identification of the Proposed Action

Iliia Ruiz Gandulla, M.D., has a United States Nuclear Regulatory Commission (NRC) license (License No. 52-24929-01) that authorizes the use, for medical therapeutic patient treatment purposes, of a strontium-90 eye applicator sealed source. The licensee has requested, in a letter dated November 21, 2002, that the NRC grant her an exemption for a limited period of time from the source calibration requirement in 10 CFR 35.432, in order to use the licensed source for patient treatment until a laboratory authorized to calibrate the source can provide the calibration required by 10 CFR 35.432. This requirement became effective on October 24, 2002.

10 CFR section 35.432 specifies that licensees may only use brachytherapy sources on or after October 24, 2002, if the licensee shall have determined the source output or activity using a dosimetry system that meet the requirements of 10 CFR 35.630(a). To meet this requirement, a licensee may perform the measurements, or use measurements provided by the source manufacturer or by a calibration laboratory accredited by the American Association of Physicists in Medicine that are made in accordance with the referenced section of the rule.

Since the 1988 calibration of the source was not performed in accordance with the requirements of 10 CFR 35.432, Dr. Gandulla, an ophthalmologist practicing in Mayaguez, Puerto Rico, has not been able to use the source since October 24, 2002. She requested recalibration of her strontium-90 eye
