Subject: LES Comment 1: NRC Environmental Impact Statement about LES

>>> "PHILLIP BARR" <pharb2@msn.com> 10/28/03 08:56AM >>>

I hope any environmental studies of the LES plant will include the high prevailing southerly winds we have in this area. Any emissions that plant has or what is carried from the wind blowing across that evaporative pond could be over Hobbs in less than one hour. We have oilfield pollution, pollution from the dairies north of town, city's sludge plant is a polluter on some days, I don't think we need any more to the mix. I hope any environmental studies will be carried out by federal agencies and not state ones. This area is not known for enforcement of pollution laws.

Phillip Barr
Hobbs
