As I understand it LES requests that impact of its plant be restricted to 4 miles.

We have winds in this area that can be 45mph and higher, depending on season. Anything released into the air from a LES plant could be over Hobbs on a windy day in one half hour. The nearest air quality official lives in Carlsbad.

I think property values in Hobbs should be considered an impact also. Would anyone really want to live near a nuclear waste dump?

Phillip Barr
