LES has submitted an application for Uranium Enrichment Plant. I am opposed to the approval of this application. Mainly from desposal of the waste. No place has been approved to take the waste product. Even if a facility is approved it will be many years before all the waste is processed and desposed from Oak Ridge and Paducah the material containers will have deteriorated to the point that would be harmful to the environment. USEC has also applied for an enrichment facility. Leading economic experts all agree that there is not enough market to support two plants and USEC is an American company as opposed to LES being a foreign company. I hope that the License will not be approved.
