**Subject:** Another objection to license application for les

With the high winds we have in this area, any radioactive or hazardous emissions could reach Eunice in a matter of just minutes. I would like to see a survey of the community to chart known cancer cases in the area and do follow-ups to see if there is any increase if this plant is licensed.

The NRC is aware of the high winds here. If they license a plant so close to a population center and high winds carry emissions from that plant and make people sick in Eunice or Hobbs, they should be liable for it.

Winds here can range from 35mph to much higher.

Phillip Barr  
Lea County
