Chairman Nils Diaz  
US Nuclear Regulatory  
Office of Public Affairs  
Washington, D.C. 20555

Dear Chairman Diaz:

I would like to share with you my feelings about the proposed National Enrichment Facility.

While I understand the project would mean many jobs, my feelings toward the plant are not based on economic security. They are based on safety and security. For that reason, I am supporting the construction of the facility.

Like many people in this nation, I have been concerned about our national security since September 11, 2001. I have watched intently as our leaders discuss and debate ways to make us safe. I feel that much of our safety comes from the companies that drive our economy.

From everything I have heard about LES and the uranium enrichment plant, I know they take safety and security very seriously.

I have attended town meetings where they have talked about plans for coordination of security with local law enforcement and emergency services. I have heard them talk about the safe storage and disposal of the uranium byproduct. Most importantly, I have heard them talk about the safety of the people who will work there – my friends and neighbors.

I feel they are taking the right steps to protect their employees, the community, and our environment. I look forward to having such a responsible neighbor in my community, and I urge you to approve their application quickly.

Sincerely,

Shalina Shaver  
Shalina Shaver
