

Not all Internet pharmacies are created equal.

Some aren't even pharmacies.

**Many Internet sites that sell medicine are not legitimate pharmacies.** Make sure a Web site is a state-licensed pharmacy that is located in the United States. Find your state's contact information from the National Association of Boards of Pharmacy (NABP) at [www.nabp.info](http://www.nabp.info).

Some sites display the Seal of the Verified Internet Pharmacy Practice Sites™ (VIPPS®) Program. For a list of state-licensed pharmacies that carry the Seal, go to [www.vipps.info](http://www.vipps.info).
