

CHICAGO WILDERNESS

Chicago Wilderness is supported by the Chicago Region Biodiversity Council, an unprecedented partnership of public and private organizations that have joined forces to protect, restore and manage these natural lands and the plants and animals that inhabit them.

Chicago Wilderness seems to be an oxymoron, but this region harbors some of the best remnants of our Midwest “wilderness”—our native plant and animal communities—remaining on earth. It is

only through active protection, management and restoration that the prairies, woodlands and wetlands comprising Chicago Wilderness will survive.

The member organizations of the Chicago Region Biodiversity Council, and the thousands of volunteers who work with them, are pooling their resources and expertise to most effectively protect, manage and restore the natural heritage of the central Midwest.
