MEMORANDUM OPINION AND ORDER

Adopted: January 24, 1994

Released: January 31, 1994

By the Commission:

**I. INTRODUCTION**

1. In this Memorandum Opinion and Order, we prescribe depreciation rates and amortizations for eleven local exchange carriers (LECs) that filed requests for such changes in 1993. We determined these depreciation rates and amortizations after considering the studies underlying the carriers' requests, the views of the state commissions, staff analyses and recommendations.

## II. BACKGROUND

2. This Commission is required by the Communications Act of 1934, as amended, to prescribe the depreciation rates<sup>1</sup> that are used to compute depreciation expense for communications common carriers. In accordance with our rules, depreciation rates are prescribed so as to fully depreciate the carriers' investments on a straight-line basis over the life of the associated plant.<sup>2</sup> In order to accomplish this we use the following formula.

$$\text{depreciation rate} = \frac{100\% - \text{accumulated depreciation \%} - \text{future net salvage \%}}{\text{average remaining life}}$$

Both the life and salvage factors are based upon estimates that require periodic review to ensure their reasonableness.

3. It is our practice to review and revise each carrier's depreciation rates and amortizations once every three years. In doing so, we review depreciation rates for approximately one-third of the larger carriers each year. This process begins when carriers submit depreciation studies, which consist of a variety of data related to the carriers' recent plant retirements and plans for future plant retirements along with their preliminary depreciation rate and amortization proposals. Some state commissions provide preliminary proposals as well. The Common Carrier Bureau then independently analyzes carriers' data and proposals and prepares its own preliminary proposals, which are forwarded to the state commissions<sup>3</sup> and the carriers. Representatives from the Bureau, the state commissions and the carriers then meet to discuss the various proposals (the three-way meetings), and at the conclusion of these meetings, the Bureau makes its recommendations. The carriers then formally file for revised depreciation rates that may or may not agree with the Bureau's recommendations and the Bureau issues a Public Notice requesting comments on the proposed depreciation rate changes.

---

<sup>1</sup> See generally 47 U.S.C § 220(b) (1982). In recent years, we have also prescribed amortization amounts in lieu of depreciation rates to resolve certain depreciation accounting problems. An amortization amount is a specific amount to be charged to depreciation expense each year. See Amortization of Depreciation Reserve Imbalances of Local Exchange Carriers, 3 FCC Rcd 984 (1988) (Amortization Order); see also the Prescription Percentages of Depreciation Pursuant to Section 220(b) of the Communications Act of 1934, as amended for: AT&T-Long Lines Department, 96 FCC 2d 257 (1983); the Prescription of Revised Percentages of Depreciation pursuant to the Communications Act of 1934, as amended for: AT&T Communications et. al., 7 FCC Rcd 1050 (1992).

<sup>2</sup> See 47 C.F.R. § 32.2000 (g)(2).

<sup>3</sup> This coordination is conducted pursuant to Section 220(i) of the Communications Act of 1934, as amended, 47 U.S.C § 220(i).

4. This year, in accordance with our triennial schedule, the eleven carriers listed in the caption submitted studies proposing revised depreciation rates and amortizations based upon revised estimates of the primary depreciation factors (*i.e.*, equipment service life, net salvage and retirement patterns). Following the procedures outlined above, the Bureau proposed rates and amortizations in a Public Notice released August 6, 1993.<sup>4</sup> Only the Virginia State Corporation Commission filed comments. No reply comments were filed.

### III. DISCUSSION

#### A. The Depreciation Rate Proposals

5. All of the rates and amortizations recommended by the Bureau at the conclusion of the three-way meetings were requested by the carriers in their formal filings and were proposed by the Bureau in the Public Notice. No one filed comments objecting to these rates or amortizations. All carriers listed in the caption filed for effective dates consistent with the depreciation rate study dates. These proposed effective dates are also consistent with our Effective Date Reconsideration Order.<sup>5</sup> We conclude, therefore, that the proposed depreciation rates, amortizations, and effective dates for all carriers are consistent with our depreciation policies and are adequately supported by the carriers' underlying studies. Accordingly, we prescribe those rates, amortizations, and effective dates as shown in the Appendix to this Order.

#### B. Submission of Whole-Life Depreciation Parameters

6. In many of the depreciation prescription orders that the Commission has approved since its decision in the Property Depreciation Order,<sup>6</sup> the Commission has expressed its concern with the size of the carriers' depreciation reserve imbalances. Because of the rapid rate of technological advancement in the industry, we continue to believe that the carriers' reserve conditions are extremely important. In order to adequately assess the reserve conditions, it is necessary to consider the whole-life rates.<sup>7</sup> As a result, we

---

<sup>4</sup> Comments Invited On Depreciation Rate Prescriptions Proposed For Domestic Telephone Carriers, 8 FCC Rcd 5535 (1993) (Public Notice).

<sup>5</sup> Prescription of Revised Percentages of Depreciation pursuant to the Communications Act of 1934, as amended for: Alascom, Inc. et. al., and Policy Regarding Effective Date of Depreciation Prescriptions, 7 FCC Rcd 798 (1992) (Effective Date Reconsideration Order). This order mandated the effective date for Commission represcription orders to be January 1 of the study year.

<sup>6</sup> Amendment of Part 31 (Uniform Systems of Accounts for Class A and Class B Telephone Companies), 83 FCC 2d 267 (1980) (Property Depreciation) reconsideration, 87 FCC 2d 916 (1981). Supplemental Opinion and Order, 87 FCC 2d 1112 (1981).

<sup>7</sup> Whole-life rates are calculated by dividing 100% less the average net salvage percentage by the average service life.

continue our policy of requiring carriers that seek to change their depreciation rates to include whole-life rates in their filings. These whole-life rates should be developed on the same underlying bases as the requested depreciation rates.

#### IV. CONCLUSION

7. Having considered the carriers' proposals, the studies upon which those proposals are based, the views and recommendations of the states, the response to the Public Notice, and the Bureau's studies and analyses, we adopt the depreciation rates, amortizations, and effective dates listed in the Appendix. If the states follow our lead, these revised depreciation and amortizations will provide an additional \$390 million in annual capital recovery. This additional capital could better position the LECs to upgrade existing plant and accelerate deployment of new telecommunications technology, thus strengthening and enhancing the American telecommunications infrastructure. Such improvements to the infrastructure would benefit the public directly by facilitating the introduction of such services as distance learning and telemedicine. The improvements could also stimulate the American economy indirectly to the extent that they enable telephone companies to provide traditional communications services at lower costs. Such an outcome would lead directly to lower rates for communications services and indirectly to greater productivity and improved economic performance for all sectors of this nation's economy.

#### V. ORDERING CLAUSES

8. ACCORDINGLY IT IS ORDERED, pursuant to Sections 4(i), 201-205 and 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. §§ 154(i), 201-205 and 220(b), that the percentages of depreciation and amortization amounts set forth in the Appendix to this Order ARE PRESCRIBED, effective on the dates listed.

9. IT IS FURTHER ORDERED that this Order is effective upon release.
