**MEMORANDUM OPINION AND ORDER**

Adopted: January 26, 1995

Released: January 31, 1995

By the Commission:

**I. INTRODUCTION**

1. In this Memorandum Opinion and Order, we prescribe depreciation rates and amortization schedules for thirteen local exchange carriers ("LECs") and AT&T. We determined these depreciation rates and amortization schedules after considering the studies underlying the carriers' requests, the views of the state commissions, and staff analysis and recommendations.

## II. BACKGROUND

2. This Commission is required by the Communications Act of 1934 to prescribe the depreciation rates<sup>1</sup> that are used to compute depreciation expense for communications common carriers. In recent years, we have also prescribed amortization schedules in lieu of depreciation rates to resolve certain depreciation accounting problems. An amortization schedule specifies amounts to be charged to the depreciation expense each year. In accordance with our rules, depreciation rates are prescribed to fully depreciate the carriers' investments on a straight-line basis over the life of the associated plant. In order to accomplish this we use the following formula:

$$\text{depreciation rate} = \frac{100\% - \text{accumulated depreciation \%} - \text{future net salvage \%}}{\text{average remaining life}}$$

Both the average remaining life and future net salvage factors are based upon estimates,<sup>2</sup> which require periodic review to ensure their reasonableness.

3. It is our practice to review and revise each carrier's depreciation rates and amortization schedules once every three years. In doing so, we review depreciation factors for approximately one-third of the larger carriers each year. This process begins when carriers submit depreciation studies, which consist of a variety of data related to the carriers' recent plant retirements and plans for future plant retirements, along with their preliminary depreciation rate and amortization proposals. This year, as a result of the Commission's efforts to simplify its depreciation procedures, these carriers were given the opportunity to use projection life and future net salvage factors based upon the ranges adopted by the Commission for 22 of the 34 plant categories.<sup>3</sup> State commissions are encouraged to provide proposals as well, and many do. The Common Carrier Bureau ("Bureau") then independently analyzes carriers' data and proposals and prepares its own preliminary proposals, which are forwarded to the state

---

<sup>1</sup> See generally 47 U.S.C § 220(b). See Amortization of Depreciation Reserve Imbalances of Local Exchange Carriers, Report and Order, 3 FCC Rcd 984 (1988) (Amortization Order); see also The Prescription Percentages of Depreciation Pursuant to Section 220(b) of the Communications Act of 1934, as amended for: AT&T-Long Lines Department, Order, 96 FCC 2d 257 (1983); The Prescription of Revised Percentages of Depreciation pursuant to the Communications Act of 1934, as amended for: AT&T Communications et. al., Memorandum Opinion and Order, 7 FCC Rcd 1050 (1992).

<sup>2</sup> Pursuant to our Rules, the depreciation rate for an account is a function of the average remaining life and future net salvage estimates and the actual accumulated depreciation ratio. The average remaining life is the estimated average of the future life expectancy of investment in a particular plant account. The future net salvage is the estimated gross salvage of the plant less any estimated cost of removal. The accumulated depreciation ratio is the ratio of the accumulated depreciation to the related plant in service. As such, it is the amount of plant investment that has been depreciated for a particular plant account. See 47 C.F.R. Section 32.2000(g)(2)(ii).

<sup>3</sup> See Simplification of the Depreciation Prescription Process, Report and Order, 8 FCC Rcd 8025 (1993) (Depreciation Simplification Order), petitions for recon. pending, see also, Further Order Inviting Comments, FCC 94-256 (released October 11, 1994); Second Report and Order, 9 FCC Rcd 3206 (1994).

commissions and the carriers. Representatives from the Bureau, the state commissions and the carriers then assemble to discuss the various proposals at "three-way meetings." At the conclusion of these meetings, the Bureau makes its recommendations. The carriers then formally file for revised depreciation rates that may or may not agree with the Bureau's recommendations and the Bureau issues a Public Notice requesting comments on the proposed depreciation rate changes.

4. This year, in accordance with our triennial schedule, the fourteen carriers listed in the caption submitted studies proposing revised depreciation rates and amortization schedules based upon revised estimates of the average remaining life, future net salvage ,and on updated actual accumulated depreciation ratios. Following the procedures outlined above, the Bureau proposed rates and amortization schedules in a Public Notice<sup>4</sup> released August 12, 1994. The Ameritech Operating Companies ("Ameritech") and the Missouri Public Service Commission ("Missouri")<sup>5</sup> filed comments. No reply comments were filed.

### III. DISCUSSION

5. For all but four accounts of one carrier, we find that the rates and amortization schedules proposed by the carriers are consistent with the recommendations made by the Bureau at the close of the three-way meetings. As discussed earlier, these recommendations were made after a comprehensive review of carrier data and studies and after thorough discussion with representatives of the carriers and respective state commissions. We note further that no party objected to any of these proposed depreciation rates and schedules.<sup>6</sup> We, therefore, adopt these rates and schedules as specified in the Appendix.

6. Missouri objected to the proposed depreciation factors for four accounts: Circuit Equipment, Computers, Underground Cable-Metallic and Buried Cable-Metallic. Missouri proposed slightly longer projection lives for the Computers, Underground Cable-Metallic and Buried Cable-Metallic accounts and a slightly higher future net salvage percentage for the Circuit Equipment Account. Because the differences in proposed factors are so slight and the proposals are based primarily on forecasts of future events, it is not possible to determine, at present, which proposal is more accurate. We note, however, that the depreciation rates listed in the Appendix were thoroughly analyzed according to the Commission's depreciation practices, fully supported by GTE-Midwest, and were derived

---

<sup>4</sup> Comments Invited On Depreciation Rate Prescriptions Proposed For Domestic Telephone Carriers, Public Notice, 8 FCC Rcd 5535 (1994) (Public Notice).

<sup>5</sup> On September 21, 1994 (errata filed September 27, 1994) Missouri filed a motion seeking leave to file its comments late and out of time. Missouri filed its comments after the reply comment deadline. For purposes of establishing a complete record, we accept Missouri's late-filed comments.

<sup>6</sup> Although Ameritech expresses a general dissatisfaction with certain of the Commission's depreciation practices, it does not challenge any of the rates and schedules proposed herein. See comments at 1-2.

applying the same methods we used for all the other carriers. For these reasons we adopt the depreciation rates and amortization schedules listed in the Appendix. We note, however, that our resolution of this depreciation issue does not preclude Missouri from adopting different depreciation rates for intrastate ratemaking purposes.<sup>7</sup>

#### IV. CONCLUSION

7. Having considered the carriers' proposals, the studies upon which those proposals are based, the views and recommendations of the states, the responses to the Public Notice, and the Bureau's studies and analyses, we adopt the depreciation rates, amortization schedules, and effective dates listed in the Appendix.

#### V. ORDERING CLAUSES

8. ACCORDINGLY IT IS ORDERED, pursuant to Sections 4(i), 201-205 and 220(b) of the Communications Act of 1934, as amended, 47 U.S.C. Sections 154(i), 201-205 and 220(b), that the percentages of depreciation and amortization schedules set forth in the Appendix to this Order ARE PRESCRIBED, effective January 1, 1994.

9. IT IS FURTHER ORDERED, that this Order is effective upon release.

FEDERAL COMMUNICATIONS COMMISSION

William F. Caton  
Acting Secretary
