Road Between Pony and Cat Creeks will have Temporary Closure

Forest Road #901, east of Condon off of State Highway 83, on the Swan Lake District of the Flathead National Forest will have some temporary travel delays and closures. The road work includes reconditioning of the road, and replacement and installation of culverts and bridges. Bridge construction at Pony and Cat Creeks on Forest Road #901, will begin July 15 and it is anticipated that the closures will be in place through August.

The road closure during the bridge construction will only impact a one-mile section between Pony Creek and Cat Creek. There will still be access to Pony and Cat Lakes, but with a bit further hike.

For more information about these temporary road delays and closures, contact the Swan Lake District at 837-7500.
