Tally Lake District and Supervisor's Offices to Co-Locate

The Tally Lake District Office and the Supervisor's Office of the Flathead National Forest will be co-located in one office building on Stillwater Road, immediately south of the new Glacier High School, in Kalispell, by the end of next year.

An award was recently made to Goldberg Properties of Denver, Colorado for leased office and warehouse space, wareyard and a parking area. Goldberg Properties' proposal provided the best overall value and best met the needs set forth by the Forest Service. Goldberg Properties secured a lease with the State of Montana for the property on which the facility will be constructed.

Thirteen proposals were received after more than 60 solicitation packages were mailed to potential bidders.

Tally Lake District Ranger Lisa Krueger said, "I'm pleased with the location of our new leased office. The co-location will provide some cost savings and will provide opportunities to share resources and services between the district and the supervisor's office."
