

So glad to read that your are working on a warning about sexually explicit emails. I am so sick and tired of receiving them. I have never gone to a porn site or replied to any of the spam that comes to my email address. That doesn't seem to matter for it comes in daily. If it can't be stopped entirely, at least a warning would be better than nothing. I added all the barriers that I know to do, as putting in certain words or language that I will not accept at my email address. They manage to evade such methods. It needs to be stopped. I will appreciate anything you can do to stop it

Thank you

Brenda Clark
