

I am in favor of distributors having to label their porn as SPAM. I would further be in favor of regulations that eliminated ALL SPAM.

I am also in favor of the legislation for the No-Call Registry. I now have back my phone and piece of mind. The next step in intrusiveness in my home via the computer is eliminating SPAM and SPYWARE.

The step after that will be amending the "Patriot Act" that allows the government to enter and search my home without my knowledge. This act was approved in haste and fear and rationality needs to intercede.

Sincerely  
Yolanda Sandoval
