PRELIMINARY DIRECTORY OF
REGIONAL MEDICAL PROGRAMS

The following Directory indicates Regional Medical Programs for which planning grants have been awarded and for which applications are in various stages of development.

The preliminary planning regions are reported as defined in the applications. It is anticipated that the regional boundaries will be evaluated and clarified during the planning process and inappropriate overlap will be eliminated.

The information presented in this Directory is preliminary. Modification and corrections are welcome so that the version to be published later will be as complete and accurate as possible.
