Notice Pursuant to the National Cooperative Research and Production Act of 1993—Cooperative Research Group on Development and Evaluation of a Gas Chromatograph Testing Protocol

Notice is hereby given that, on March 6, 2008, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 et seq. (“the Act”), Southwest Research Institute—Cooperative Research Group on Development and Evaluation of a Gas Chromatograph Testing Protocol (“GCTP”) has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act’s provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to Section 6(b) of the Act, the identities of the parties to the venture are: ABE Inc., Totalflow Products, Bartlesville, OK; Chevron Pipeline, Houston, TX; Operations Technology Development, Des Plains, IL; Questar Gas Company, Salt Lake City, UT; KeySpan Energy, Hicksville, NY; APGA Research Foundation, Mesa, AZ; Southern California Gas Company, Los Angeles, CA; NiCor Gas, Naperville, IL; Consolidated Edison Company of New York Inc., New York, NY; Pacific Gas & Electric Co., Walnut Creek, CA; and TransCanada Pipelines Ltd, Calgary, Alberta, Canada.

The general area of GCTP’s planned activity is to develop a performance test protocol for gas chromatographs (“GCs”) used by the natural gas industry. A test procedure will be created and evaluated through tests of multiple brands of GCs in controlled experiments. Findings will be provided to the American Petroleum Institute for use in developing a test protocol for general use. The general protocol will help users in the natural gas industry to define test conditions for their own performance evaluations. With this protocol, industry users can

select reliable and appropriate GCs for their own applications. The protocol may also be used to support acceptance of units by custody transfer parties and regulatory agencies, such as BLM, MMS, PHMSA, or state regulatory bodies. Membership in this research group remains open, and the participants intend to file additional written notification disclosing all changes in membership or planned activities.

Description: Section 203(a)(3)(B) of the Employee Retirement Security Act and regulations thereunder (see 29 CFR 2530.203-3) govern the circumstances under which pension plans may suspend pension benefit payments to retirees that return to work, or of participants who continue to work beyond normal retirement age. More specifically, in order for a plan to suspend benefits pursuant to the regulation, it must notify the affected retiree or participant during the first calendar month or payroll period in which the plan withholds payment that benefits are suspended. The notice must include the specific reasons for such suspension, a general description of the plan provisions authorizing the suspension, a copy of the relevant plan provisions, and a statement indicating where the applicable regulations may be found, i.e., 29 CFR 2530.203-3. In addition, the suspension notification must inform the retiree or participant of the plan's procedure for affording a review of the suspension of benefits.

The requirement that retirees or participants be notified in the event of a suspension of benefits is intended to protect their non-forfeitable right to their normal retirement benefits. By informing retirees or participants of the reasons for the suspension, the authority for the suspension, and the plan's procedure for review of a suspension of benefits, participants are made aware of the status of their pension benefits and are able to raise with the plan facts or issues that may be relevant to determining whether a suspension of

benefits is proper under the circumstances. For additional information, see related notice published at 72 FR 72767 on December 21, 2007.
