

corporate leadership. Additionally, corporate membership will allow the EPA to explore broad and innovative approaches to achieving environmental benefits stemming from corporate-level decisions, such as supply chain management and product stewardship.

The criteria for corporate members are expected to include: participation by a substantial number of their facilities in Performance Track or similar State programs and commitment to increase this participation over time. The EPA believes this link between the corporate and facility programs will encourage stronger corporate-level commitment to Performance Track and performance excellence. Other criteria would parallel those that Performance Track currently applies to facilities, with a greater emphasis on companies working with their suppliers and customers to achieve environmental improvements.

EPA expects to solicit applications for this program later in 2004.

General information about the SAB can be found in the SAB Web Site at: <http://www.epa.gov/sab>.

SUPPLEMENTARY INFORMATION:

Background on the Advisories: The EPA Office of Research and Development (ORD) has developed multi-year plans (MYPs) on selected topics to focus its research program on the highest priority issues and provide coordination for achieving long-term research goals. The Contaminated Sites MYP describes ORD problem-driven research supporting three Office of Solid Waste and Emergency Response (OSWER) trust fund programs for which research is authorized: Superfund (SF), Leaking Underground Storage Tank Corrective Action (LUST CA) and the Oil Spills Program. Contaminated Sites research is aligned in four long-term goals, with three of the goals based on the affected medium—sediment, ground water, and soil/land—and one goal for cross-cutting issues. The Resource Conservation and Recovery Act (RCRA) MYP focuses primarily on treatment processes for hard-to-treat chemicals; innovative containment technologies; resource conservation; and site-specific technical support and state-of-the-art methods, tools, and models for addressing priority RCRA management issues. ORD has requested an advisory from the SAB as to the soundness of the research plans.

The SAB Staff Office has determined that the advisory on these MYPs will be conducted by the SAB's Environmental Engineering Committee supplemented with experts from the SAB Ecological Processes and Effects Committee and the EPA Board of Scientific Counselors. Collectively these individuals will form the SAB Contaminated Sites and RCRA Multi-Year Plan Advisory Panel. A Panel roster and biosketches will be posted on the SAB Web Site at: <http://www.epa.gov/sab>. Public comment on the Panel will be accepted until June 7, 2004.

Availability of Meeting Materials: EPA ORD's Contaminated Sites Research Program Multi-Year Plan and Resource Conservation and Recovery Act Research Program Multi-Year Plan will be available electronically at the following URL address: <http://www.epa.gov/osp/myplan.htm>. For information and any questions

pertaining to the review documents, please contact Ms. Patricia Erickson, EPA-ORD, via telephone: (513) 569-7406 or e-mail: erickson.patricia@epa.gov.

Draft meeting agendas and the charge to the SAB CS and RCRA Panel will be posted on the SAB Web Site prior to the public meetings at: <http://www.epa.gov/sab>.

Speakers should bring at least 35 copies of their comments and presentation slides for distribution to the participants and the public at the meeting. **Written Comments:** Although written comments are accepted until the date of the meeting, written comments should be received in the SAB Staff Office at least one week prior to the meeting date so that the comments may be made available to the panel for their consideration. Comments should be supplied to the DFO at the address/contact information noted above in the following formats: one hard copy with original signature, and one electronic copy via e-mail (acceptable file format: Adobe Acrobat, WordPerfect, Word, or Rich Text files (in IBM-PC/Windows 95/98 format)).
