FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87-97; RM-5598]

Radio Broadcasting Services; Laughlin, NV

AGENCY: Federal Communications Commission.

ACTION: Correcting amendment.

SUMMARY: This document contains a correction to Section 73.202(b), FM Table of Allotments, under Nevada for the community of Laughlin.

DATES: Effective March 11, 2004. FOR FURTHER INFORMATION CONTACT:

Victoria McCauley, Media Bureau (202) 418–2180.

SUPPLEMENTARY INFORMATION: In 1987, the Commission allotted Channel 300C1 to Laughlin, Nevada. See 52 FR 38766 (October 19, 1987). The channel is not currently listed in the FM Table of Allotments, Section 73.202(b) under Nevada for the community of Laughlin. Station KVGS(FM) obtained a license for this channel on May 13, 1992. See BLH-19910903KD. Station KVGS(FM) currently operates on Channel 300C at Laughlin, Nevada because the station was granted a license to specify operation on Channel 300C in lieu of Channel 300C1 at Laughlin, Nevada on June 20, 2001, See BLH-20010327ABN.

Need for Correction

The Code of Federal Regulations must be corrected to include Channel 300C at Laughlin, Nevada.

List of Subjects in 47 CFR Part 73

Radio, Radio broadcasting.

■ Accordingly, 47 CFR part 73 is corrected by making the following correcting amendment:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for Part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, and 336.

§73.202 [Amended]

■ 2. Section 73.202(b), the Table of FM Allotments under Nevada, is amended by adding Channel 300C at Laughlin.

Dated: February 12, 2004.

Federal Communications Commission. **John A. Karousos**,

Assistant Chief, Audio Division, Media Bureau.

RIN 0648-AR53

Taking of Threatened or Endangered Species Incidental to Commercial Fishing Operations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS is issuing a final rule to prohibit shallow longline sets of the type normally targeting swordfish on the high seas in the Pacific Ocean east of 150° W. long. by vessels managed under the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species (FMP). This action is intended to protect endangered and threatened sea turtles from the adverse impacts of shallow longline fishing by U.S. longline fishing vessels in the Pacific Ocean and operating out of the west coast. This rule supplements the regulations that implement the FMP that prohibit shallow longline sets on the high seas in the Pacific Ocean west of 150° W. long. by vessels managed under that FMP. The FMP was partially approved by NMFS on February 4, 2004. Together, these two regulations are expected to conserve leatherback and loggerhead sea turtles as required under the Endangered Species Act (ESA). DATES: This final rule is effective April

DATES: This final rule is effective Apri 12, 2004.

ADDRESSES: Copies of the FMP, which includes an environmental impact statement (EIS) accompanied by a regulatory impact review (RIR) and an initial regulatory flexibility analysis (IRFA) are available on the internet at http://www.pcouncil.org/hms/hmsfmp.html or may be obtained from

Daniel Waldeck, Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 200, Portland, Oregon, 97220–1384, Daniel.Waldeck@noaa.gov, (503) 820– 2280. This final rule corresponds to the

2280. This final rule corresponds to the High Seas Pelagic Longline Alternative 3 in the Council EIS, RIR, and IRFA. The final regulatory flexibility analysis (FRFA) is available on the internet at http://swr.ucsd.edu/ or may be obtained from Tim Price, NMFS, 501 West Ocean Boulevard, Suite 4200, Long Beach, California, 90802–4213,

Tim.Price@noaa.gov, (562) 980-4029.

FOR FURTHER INFORMATION CONTACT: Tim Price, NMFS, Southwest Region, Protected Resources Division, 562–980–4029.

SUPPLEMENTARY INFORMATION:

Additional information about the status of sea turtles and the West Coast-based pelagic longline fishery can be found in the proposed rule published on December 17, 2003 (68 FR 70219). All species of sea turtles that are known to interact with U.S. longline vessels in the Pacific Ocean are listed as either endangered or threatened under the ESA. The incidental take of endangered species may be authorized only by an incidental take statement issued under section 7 of the ESA or an incidental take permit issued under section 10 of the ESA. The incidental take of threatened species may be authorized only by an incidental take statement in a biological opinion issued pursuant to section 7 of the ESA, an incidental take permit issued pursuant to section 10 of the ESA, or regulations under section 4(d) of the ESA.

A number of longline vessels targeting swordfish unload their catch and reprovision in California ports. Participants in the West Coast-based pelagic longline fishery often fish more than 1,000 nautical miles (1,900 km) offshore and are generally prohibited by state regulations from fishing within 200 nautical miles (370 km) of the West Coast. From October 2001 through January 31, 2004, 409 sets were observed on 20 trips, documenting a total of 46 sea turtle interactions, consisting of 3 leatherback sea turtles, 42 loggerhead sea turtles, and 1 olive ridley sea turtle. All of the observed sea turtles were released alive except two recent loggerhead sea turtles which were dead.

On October 31, 2003, the Pacific Fishery Management Council (Council) submitted the FMP to NMFS for review. The FMP includes management measures for the West Coast-based pelagic longline fishery that prohibits shallow longline sets of the type
