

refueling requirements. The Task Force will assess current and future requirements with respect to both legacy systems and missions, and take into account proposed future systems and capabilities.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology & Logistics on scientific and technical matters as they affect the perceived needs of the Department of Defense. Specifically, using best estimates of requirements for 2010, 2020, and 2030, the Task Force will assess the following options with respect to DoD aerial refueling capability: (1) Retain the requisite number of assets to maintain current capability; (2) perform service life extension on the requisite number of existing aircraft; (3) acquire new refueling capabilities; and (4) evaluate other methods to address refueling needs.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. 92-463, as amended (5 U.S.C. App. II), it has been determined that these Defense Science Board Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) and that, accordingly, the meetings will be closed to the public.

Due to critical mission requirements and the short timeframe to accomplish this review, there is insufficient time to provide timely notice required by section 10(a)(2) of the Federal Advisory Committee Act and subsection 101-6.1015(b) of the GSA Final Rule on Federal Advisory Committee Management, 41 CFR part 101-6, which further requires publication at least 15 calendar days prior to the first meeting of the Task Force on Aerial Refueling Requirements.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-7619-8]

### Integrated Risk Information System (IRIS); Announcement of 2004 Program; Request for Information

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice; announcement of IRIS 2004 program agenda and request for scientific information on human health effects that may result from exposure to chemical substances.

**SUMMARY:** The Environmental Protection Agency (EPA) is announcing the IRIS 2004 agenda and requesting scientific information on health effects that may result from exposure to the chemical substances for which EPA is starting assessments this year.

The Integrated Risk Information System (IRIS) is an EPA data base that contains the Agency's scientific consensus positions on human health effects that may result from exposure to chemical substances in the environment. On February 5, 2003 (68 FR 5870) and later supplemented on August 13, 2003 (68 FR 48359), EPA announced the 2003 IRIS agenda, with the solicitation of scientific information from the public for consideration in assessing health effects from specific chemical substances. Many of these assessments are on-going or near completion. All assessments completed in FY03 and early FY04 are listed in this notice. This notice also describes some of EPA's efforts to improve the IRIS program.

**DATES:** Please submit any scientific information in response to this notice in accordance with the instructions provided at the end of this notice by April 9, 2004.

**ADDRESSES:** Please submit relevant scientific information identified by docket ID number ORD-2003-0016, online at <http://www.epa.gov/edocket> (EPA's preferred method); by e-mail to [oei.docket@epa.gov](mailto:oei.docket@epa.gov); mailed to EPA Docket Center, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460-0001; or by hand delivery or courier to EPA Docket Center, EPA West, Room B102, 1301 Constitution Ave., NW., Washington, DC, between 8:30 a.m. and 4:30 p.m. Monday through Friday, excluding legal holidays. Comments on a disk or CD-ROM should be formatted in Wordperfect or ASCII file, avoiding the use of special characters and any form

of encryption, and may be mailed to the mailing address above.

**FOR FURTHER INFORMATION CONTACT:** For information on the IRIS program, contact Amy Mills, Program Director, National Center for Environmental Assessment, (mail code 8601D), Office of Research and Development, U.S. Environmental Protection Agency, Washington, DC 20460; telephone: (202) 564-3204, facsimile: (202) 565-0075; or e-mail: [mills.amy@epa.gov](mailto:mills.amy@epa.gov).

For general questions about access to IRIS, or the content of IRIS, please call the IRIS Hotline at (202) 566-1676 or send electronic mail inquiries to [hotline.iris@epa.gov](mailto:hotline.iris@epa.gov).

#### SUPPLEMENTARY INFORMATION:

##### Background

IRIS is an EPA data base containing Agency scientific positions on potential adverse human health effects that may result from exposure to chemical substances found in the environment. IRIS currently provides information on health effects associated with more than 500 chemical substances.

The data base includes chemical-specific summaries of qualitative and quantitative health information in support of the first two steps of the risk assessment process, *i.e.*, hazard identification and dose-response evaluation. Combined with specific situational exposure assessment information, the information in IRIS may be used as a source in evaluating potential public health risks from environmental contaminants.

EPA's overall process for developing IRIS assessments consists of: (1) An annual **Federal Register** announcement of EPA's IRIS agenda and call for scientific information from the public on selected chemical substances; (2) a search of the scientific literature; (3) development of IRIS summaries and support documents; (4) agency review; (5) external peer review; (6) management review and approval; (7) entry of IRIS summaries and support documents into the IRIS data base (<http://www.epa.gov/iris>).

##### The IRIS Annual Agenda

Each year, EPA develops a list of priority chemical substances and an annual agenda for the IRIS program. EPA uses four general criteria to set these priorities: (1) EPA statutory, regulatory, or program-specific implementation needs; (2) availability of new scientific information or methodology that might significantly change the current IRIS information; (3) interest to other levels of government or the public; and (4) availability of other
