Agency Information Collection Activity Under OMB Review

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for extension of the currently approved collection. The ICR describes the nature of the information collection and the expected burden. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on July 13, 2004, page 42078.

DATES: Comments must be submitted on or before January 26, 2005. A comment to OMB is most effective if OMB receives it within 30 days of publication.

FOR FURTHER INFORMATION CONTACT: Judy Street on (202) 267-9895.

SUPPLEMENTARY INFORMATION:

Federal Aviation Administration

Title: Airport Noise Compatibility Planning.

Type of Request: Extension of a currently approved collection.

OMB Control Number: 2120-0517.

Forms(s): NA.

Affected Public: A total of 15 airport operators and consultants.

Abstract: The respondents are those airport operators voluntarily submitting noise exposure maps and noise compatibility programs to the FAA for review and approval. FAA approval makes airport operators' noise compatibility programs eligible for discretionary grant funds set aside

under the FAA Airport Improvement Program for that purpose.

Estimated Annual Burden Hours: An estimated 43,650 hours annually.

Addresses: Send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, Attention FAA Desk Officer.

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimates of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued in Washington, DC, on December 17, 2004.

Judith D. Street,

FAA Information Collection Clearance Officer, Standards and Information Division, APF-100.

BILLING CODE 4910-13-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. FAA-2003-16171]

Aircraft Rescue and Fire Fighting (ARFF) Mobile Live Fire Training Simulators

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of policy.

SUMMARY: The FAA issues regulations and prescribes standards for the training of aircraft rescue and fire fighters (ARFF) on United States airports certificated under 14 Code of Federal Regulations part 139. One of the requirements of part 139 is for all ARFF personnel to participate in at least one live-fire drill every 12 months. As guidance for airport operators in providing this training, the FAA issued

standards for different size fire training facilities based on the largest air carrier aircraft serving the airport. With the introduction of new technologies, ARFF personnel have had the option to train on both mobile as well as fixed training facilities. The FAA published a Notice of Proposed Policy: Request for Comments in the **Federal Register** on September 18, 2003 at 68 FR 54772, seeking public comment on whether we should allow firefighters at Index C, D, and E airports to meet the § 139.319 requirements using the mobile trainers every year. As a result of the comments received, FAA's policy is being modified to accept mobile simulators for 2 years for Index C, D, and E airports holding a Class I airport operating certificate. Every third year, these airport fire departments will be required to attend a large fixed facility to learn about new technologies and procedures and to gain experience fighting a larger pit fire than the mobile simulators can duplicate. Class I airports that are Index A and B and Class II, III, and IV airports may continue to use the mobile trainer every year to meet the 14 CFR part 139 requirements.

FOR FURTHER INFORMATION CONTACT: Ken Gilliam, Senior Fire Fighting Specialist, Airport Safety and Operations Division,

AAS-300, Federal Aviation Administration, 800 Independence Ave. SW., Washington, DC 20591, telephone (407) 812-6331, ext 34.

SUPPLEMENTARY INFORMATION: The 1988 revision of 14 Code of Federal Regulations part 139, Certification and Operations: Land Airports Serving Certain Air Carriers, section 139.319(j)(3) requires "All rescue and fire fighting personnel participate in at least one live fire drill every 12 months." 52 FR 44276 (Nov. 18, 1997) (effective Jan. 1, 1988). At the time this rule was promulgated, hydrocarbon fuels, such as diesel or jet-A, fueled the training facilities. In the early 1990s, Federal and State environmental protection agencies began banning such facilities because of ground contamination from the fuel. As a result, the FAA assisted in developing Liquid Propane Gas (LPG) fired facilities. The FAA funded these facilities throughout the country. The FAA refers to them as regional training facilities because, mostly, they were intended to serve an area of more than one state. The aim was for a fire fighter to travel to the nearest training facility and receive both classroom and live fire training. FAA's position has been that all ARFF personnel should be exposed to live
