

Section 302 (b) of the P&S Act requires the Secretary to determine which stockyards meet this definition, and to notify the owner of the stockyard and the public of that determination by posting a notice in each designated stockyard. After giving notice to the

stockyard owner and to the public, the stockyard will be subject to the provisions of Title III of the P&S Act (7 U.S.C. 201–203 and 205–217a) until the Secretary deposes the stockyard by public notice.

This document notifies the stockyard owners and the public that the following nine stockyards meet the definition of stockyard and that we propose to designate the stockyards as posted stockyards.

facility has been torn down or otherwise destroyed, such as by fire, the facility is dilapidated beyond repair, or the facility has been converted and its function changed.

## CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

### Sunshine Act Meeting

**TIME AND DATE:** Thursday, July 15, 2004, at 10 a.m. EDT.

**PLACE:** General Services Administration Auditorium, 18th and F Streets, NW., Washington, DC 20006.

**STATUS:** Open to the public.

**MATTERS TO BE CONSIDERED:** The Chemical Safety and Hazard Investigation Board (CSB) is convening this public meeting in connection with its investigation of an explosion and fire that occurred in March 2004 at a Huntsman facility in Port Neches, Texas and, separately, its examination of the hazards associated with sodium hydrosulfide.

At this meeting CSB staff will present to the Board a safety bulletin based on the investigation of the Huntsman incident. The key issue examined in the bulletin is the removal of hazardous liquids in piping systems. The bulletin briefly explains the facts of the Huntsman incident, describes the incident causes, and reviews lessons learned.

CSB staff will also present to the Board a safety bulletin on the hazards associated with sodium hydrosulfide (NaHS), a chemical used in a variety of industries, including the leather tanning and pulp and paper industries. NaHS can cause severe burns and has a propensity to produce toxic hydrogen sulfide gas, which has resulted in a number of worker fatalities. The bulletin is intended to increase awareness of the hazards of NaHS and to outline safety practices to minimize the potential for harm to workers and the public. The

bulletin also includes brief case studies of selected incidents involving NaHS.

After the staff presentations the Board will allow time for public comment. Following the conclusion of the comment period, the Board will consider whether to vote to approve the two safety bulletins.

All staff presentations are preliminary and are intended solely to allow the Board to consider in a public forum the issues and factors involved in the cases. Factual analyses, conclusions, or findings contained in the staff presentations should not be considered final. Only after the Board has considered the staff presentations and approved the staff reports will the safety bulletins be final Board products.

The meeting will also include a brief presentation on activity in the CSB recommendations program.

This meeting will be open to the public. Please notify CSB if a translator or interpreter is needed, at least five (5) business days prior to the meeting.

Individuals attending this meeting should plan to arrive 20 to 30 minutes before the scheduled start time in order to be processed through the building's security screening.
