

of croplands and moist-soil units. Access to this bottomland hardwood refuge is sometimes only possible by boat in the spring. Road access is limited due to frequent flooding and storms.

The primary purpose of the refuge is to provide wood duck brood habitat and serve as a protected wintering area for waterfowl. Up to 200 broods of wood ducks are produced annually in the refuge's artificial nest boxes, and wintering waterfowl numbers can exceed 10,000. Following a successful bald eagle hacking program in the early 1990s, the refuge has played host to a nesting pair of eagles each winter.
