

NSPS were promulgated for this source category.

The control of emissions of particulate matter from phosphate rock plants requires not only the installation of properly designed equipment, but also the operation and maintenance of that equipment. Emissions of particulate matter from phosphate rock plants are the result of operation of the calciners, dryers, grinders, and ground rock handling and storage facilities. These standards rely on the capture of particulate emissions by a baghouse or wet scrubber.

In order to ensure compliance with these standards, adequate reporting and recordkeeping is necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. Notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. The reviewing authority may then inspect the source to check if the pollution control devices are properly installed and operated. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard and note the operating conditions (flow rate and pressure drop) under which compliance was achieved. Quarterly reports are used for problem identification, as a check on source operation and maintenance, and for compliance determinations. The standard also requires semiannual reporting of deviations from monitored scrubber pressures or opacity, as these are good indicators of the source's compliance status.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

**Burden Statement:** The annual public reporting and recordkeeping burden for this collection of information is estimated to average 55.2 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions;

develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Respondents/Affected Entities:** Phosphate Rock Plants.

**Estimated Number of Respondents:** 13.

**Frequency of Response:** Initially and semiannually.

**Estimated Total Annual Hour Burden:** 1,602 hours.

**Estimated Total Annual Costs:** \$226,245, which includes \$12,000 annualized capital/startup costs, \$112,000 annual O&M costs, and \$102,245 annual labor costs.

**Changes in the Estimates:** There is decrease of 1,400 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is due to a decrease in the estimated number of existing affected sources and a decrease in the predicted growth rate of the industry.

Dated: September 5, 2004.

## ENVIRONMENTAL PROTECTION AGENCY

[OECA-2004-0010; FRL-7814-3]

### Agency Information Collection Activities; Submission for OMB Review and Approval; Comment Request; NSPS for Small Industrial-Commercial-Institutional Steam Generating Units, (Renewal) ICR Number 1564.06, OMB Number 2060-0202

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act, this document announces that an Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval. This is a request to renew an existing approved collection. This ICR is scheduled to

expire on October 31, 2004. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. This ICR describes the nature of the information collection and its estimated burden and cost.

**DATES:** Additional comments may be submitted on or before October 18, 2004.

**ADDRESSES:** Submit your comments, referencing docket ID number OECA-2004-0010, to (1) EPA online using EDOCKET (our preferred method), by email to [docket.oeca@epa.gov](mailto:docket.oeca@epa.gov), or by mail to: Environmental Protection Agency, EPA Docket Center (EPA/DC), Enforcement and Compliance Docket and Information Center, EPA West, Mail Code 2201T, 1200 Pennsylvania Avenue, NW., Washington, DC 20460, and (2) OMB at: Office of Information and Regulatory Affairs, Office of Management and Budget (OMB), Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503.

**FOR FURTHER INFORMATION CONTACT:** Dan Chadwick, Compliance Assessment and Media Programs Division, Office of Compliance, Mail Code 2223A, Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460; telephone number: (202) 564-7054; fax number: (202) 564-0050; e-mail address: [chadwick.dan@epa.gov](mailto:chadwick.dan@epa.gov).

**SUPPLEMENTARY INFORMATION:** EPA has submitted the following ICR to OMB for review and approval according to the procedures prescribed in 5 CFR 1320.12. On May 25, 2004, (69 FR 29718), EPA sought comments on this ICR pursuant to 5 CFR 1320.8(d). EPA received no comments.

EPA has established a public docket for this ICR under Docket ID No. OECA-2004-0010, which is available for public viewing at the Enforcement and Compliance Docket and Information Center in the EPA Docket Center (EPA/DC), EPA West, Room B102, 1301 Constitution Avenue, NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center is (202) 566-1752. An electronic version of the public docket is available through EPA Dockets (EDOCKET) at <http://www.epa.gov/edocket>. Use EDOCKET to submit or view public comments, access the index listing of the contents of the

public docket, and to access those documents in the public docket that are available electronically. When in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing in EDOCKET as EPA receives them and without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in EDOCKET. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing in EDOCKET. For further information about the electronic docket, see EPA's **Federal Register** notice describing the electronic docket at 67 *FR* 38102 (May 31, 2002), or go to <http://www.epa.gov/edocket>.

*Title:* NSPS for Small Industrial-Commercial-Institutional Steam Generating Units (40 CFR part 60, subpart Dc) (Renewal).

*Abstract:* The New Source Performance Standards (NSPS) for small industrial-commercial-institutional steam generating units, published at 40 CFR part 60, subpart Dc, were proposed on June 9, 1989, and promulgated on September 12, 1990. These standards apply to industrial-commercial-institutional steam generating units with maximum design heat input capacity of 29 megawatts (MW) (100 million Btu/hr) or less, but greater than or equal to 2.9 MW (10 million Btu/hr), commencing construction, modification, or reconstruction after June 9, 1989. The standards limit the emissions of sulfur dioxide (SO<sub>2</sub>) and particulate matter (PM). For the purposes of this document, new units are those affected units that have had construction, modification, or reconstruction within the last three years. This information is being collected to assure compliance with 40 CFR part 60, subpart Dc.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports. Owners or operators are also required to maintain records of the occurrence and duration

of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NSPS.

Any owner or operator subject to the provisions of this part shall maintain a file of these measurements, and retain the file for at least two years following the date of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the United States Environmental Protection Agency (EPA) regional office. Once received by the authority, reports are reviewed and the data is entered, analyzed, and maintained in the Air Facility System (AFS). Information from these reports can be used by any of the regions, states, agencies or offices with access to AFS and may be used in determining where inspections and enforcement actions may be necessary.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

*Burden Statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to average 287 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*Respondents/Affected Entities:* Owners or operators of small industrial-commercial-institutional steam generating units commencing construction, modification, or reconstruction after June 9, 1989.

*Estimated Number of Respondents:* 235.

*Frequency of Response:* Initially; Semi-annually; On occasion.

*Estimated Total Annual Hour Burden:* 156,610 hours.

*Estimated Total Annual Costs:* \$19,653,054, which includes \$1,491,005 annualized capital/startup costs, \$7,955,140 annual O&M costs, and \$10,206,909 annual labor costs.

*Changes in the Estimates:* There is a decrease of 276,157 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This decrease is primarily due to a decrease in the expected number of new sources over the next three years and the resulting decrease in the burden associated with submitting notifications.

Dated: September 5, 2004.

## ENVIRONMENTAL PROTECTION AGENCY

[FRL-7813-2]

### Notice of Proposed Administrative Settlement Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, as Amended by the Superfund Amendments and Reauthorization Act; 38th Street Radiation Removal Site

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice, request for public comments.

**SUMMARY:** In accordance with section 122(i) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), 42 U.S.C. 9622(h)(1), notice is hereby given of a proposed Administrative Order on Consent ("AOC, Region 9 Docket No. 2004-00015) pursuant to section 122(h)(1) of CERCLA concerning the 38th Street Radiation Removal Site (the "Site"), located in San Diego, California. The respondent to the AOC is California Department of Transportation ("Cal-Trans"). The AOC provides Cal-Trans with a covenant not to sue and contribution protection for the removal action at the Site. To date, EPA has incurred approximately \$967,836.00 in response costs related to the Site. Cal-Trans is reimbursing \$84,301.53 of the incurred response costs to EPA, consistent with EPA's determination of \$84,301.53 Cal-Trans' ability to pay. For
