

FAA, the Administrator renders a determination that the PFC application is substantially complete or not substantially complete. Following the initial determination for completeness and notification to the public agency, the FAA publishes a notice in the **Federal Register** advising the public of the application and inviting comment. At that time the public agency must make the application, notice and other documents relevant to the application available for inspection upon request, and may publish notice in a newspaper of general circulation in the area where the airport is located. After review of the application and public comments, the Administrator issues a final decision approving or disapproving the application in whole or in part, not later than 120 days from receipt of the application by the FAA Airports office.

Where an application requires a determination of need under Section 122 of Vision 100, a public agency needs to present a thorough financial analysis in accordance with 14 CFR 158.25(b) and (c). If an airport has developed a financial prospectus that would demonstrate its financial need or a financial recovery plan that identifies all available resources, it is encouraged to submit these documents with the application.

The public agency may wish to include the following types of information as indicators of its financial need in its PFC application:

- Evidence of a change in passenger enplanements for a carrier;
- Documentation of negative actions taken on the public agency's bond rating;
- Discussion of the inability of the public agency to meet bond payments and associated requirements;
- Discussion of alternative sources of revenue available to the public agency such as grant funds, state funds, concession revenue, and revenue from other carriers serving the airport.
- In the case of concession and carrier revenue, discuss the impact of any necessary increases to the rate base or landing fees as a result of the loss of revenue from a change in economic circumstances, for example, the bankruptcy or financial troubles of a carrier;
- Discussion of actions taken by the public agency to reduce its costs such as operational changes, personnel actions, or capital project deferment;
- Any other information the public agency believes will document the financial hardship of the airport.

All information submitted by the public agency through the PFC application process will be considered

by the FAA in making a final agency decision. This final agency decision will include a discussion of the financial needs of the public agency under Section 122 of the Vision 100 Act.

Issued in Washington, DC, on April 9, 2004.

Mr. Snyder can be contacted at (847) 294-7538 (voice), (847) 294-7036 (facsimile) or by e-mail at 9-AGL-GYY-EIS-Project@faa.gov.

SUPPLEMENTARY INFORMATION: At the request of the Gary/Chicago Airport Authority, the FAA is preparing an Environmental Impact Statement. The review will address specific improvements at the Gary/Chicago International Airport as identified during the 2001 Airport Master Plan process and the 2003 Railroad Relocation Study, and shown on the 2004 Airport Layout Plan. The following improvements have been grouped into four categories and are identifying as ripe for review and decision: (1) Improvements associated with the existing Runway 12-30, the primary air carrier runway at the airport, relocate the E.J. & E. Railroad, acquire land northwest of the airport to allow for modifications to the runway safety area, relocate the airside perimeter roadway (including providing a southwest access roadway), relocate the Runway 12-30 navoids, improve the Runway Safety Area for Runway 12, relocate the Runway 12 threshold to remove prior displacement, and acquire land southeast of the airport, located within or immediately adjacent to the runway protection zone; (2) Extension of Runway 12-30, (1356 feet), relocate the

Runway 12–30 nav aids, extend parallel taxiway A to the new end of Runway 12, construct deicing hold pads on Taxiway A at Runway 12 and Runway 30, and develop two high-speed exit taxiways; (3) Expansion of the existing passenger terminal to accommodate projected demands; and (4) analysis of sites adjacent to the extended runway for potential aviation related development, including a future new passenger terminal and air cargo area.

The purpose and need for these improvements is reviewed in the DEIS. All reasonable alternatives will be considered including the no-action alternative.

Comments from interested parties on the DEIS are encouraged and may be presented verbally at a public workshop/hearing or may be submitted in writing to the FAA at the address listed in the section entitled **FOR FURTHER INFORMATION CONTACT**. The comment period will close on June 11, 2004.

Issued in Des Plaines, Illinois, on April 9, 2004.
