Continuously accelerating technological changes in telecommunications design, manufacturing, and deployment require that the Commission be promptly informed of those changes to fulfill its statutory mandate effectively. The Council was established by the Federal Communications Commission to provide a means by which a diverse array of recognized technical experts from different areas such as manufacturing, academia, communications services providers, the research community, etc., can provide advice to the FCC on innovation in the communications industry. At this seventh and last meeting of the Technological Advisory Council III, the Council will discuss the current state-of-the-art of Ultra Wide Band (UWB), planned applications, and product roadmaps for the applications, and challenges. Invited speakers from the Multiband OFDM Alliance (MBOA) and UWB Forum will present live demonstrations of alternative UWB technologies: multiband OFDM and DSC-SS.

The Federal Communications Commission will attempt to accommodate as many persons as possible. Admittance, however, will be limited to the seating available. Unless so requested by the Council's Chair, there will be no public oral participation, but the public may submit written comments to Jeffery Goldthorp, the Federal Communications Commission's Designated Federal Officer for the Technological Advisory Council, before the meeting.
