National Toxicology Program; National Institute of Environmental Health Sciences (NIEHS); National Institutes of Health (NIH) Notice of an Expert Panel Meeting To Assess the Current Validation Status of In Vitro Testing Methods for Identifying Potential Ocular Irritants; Request for Comments

Summary

Notice is hereby given of a meeting sponsored by the NIEHS and the National Toxicology Program (NTP), and organized by the NTP Interagency Center for the Evaluation of Alternative Toxicological Methods (NICEATM) in collaboration with the Interagency Coordinating Committee on the Validation of Alternative Methods (ICCVAM). At this meeting, an expert panel ("Panel") will assess the current validation status and develop recommendations for further validation of in vitro test methods proposed for identifying substances that may cause serious eye damage. The meeting will take place on January 11-12, 2005, from 8:30 a.m. to 5 p.m., at the National Institutes of Health (NIH), Natcher Center, Bethesda, MD. The meeting is open to the public with attendance limited only by the space available.

Evaluation of In Vitro Ocular Test Methods Background

In August 2003, the Scientific Advisory Committee on Alternative Toxicological Methods (SACATM) recommended that ICCVAM review the validation status of screening test methods that could be used to identify severe and irreversible ocular effects and carry out appropriate reviews of these test methods. In October 2003, the U.S. Environmental Protection Agency nominated several ocular-related activities to ICCVAM including evaluation of the validation status of four in vitro ocular toxicity test methods for screening for severe/irreversible ocular effects: (1) The Bovine Corneal Opacity and Permeability (BCOP) test; (2) the Hen's Egg Test—Chorion Allantoic Membrane (HET-CAM); (3) the Isolated Rabbit Eye (IRE) test; and (4) the Isolated Chicken Eye (ICE) test. ICCVAM endorsed the review of the methods as a high priority and recommended that Background Review Documents be developed for each method by NICEATM in collaboration with the ICCVAM Ocular Toxicity Working Group.
