

Therefore, staff's preferred alternative is to revise the 2001 Order with additional conditions. These include adding a per-batch, mass limit for stabilization not to exceed the concentration limits in Condition 1 of the exemption times 600 kg of waste and continuing to restrict WCS from using magnesium oxide in stabilization, per Condition 2 of the exemption. The staff has concluded that, with these revised conditions, the conclusion in the 2001 EA associated with the 2001 Order remains valid.
