Title: NSPS for Portland Cement Plants (40 CFR part 60, subpart F) (Renewal).

Abstract: Particulate matter emissions from portland cement plants cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, NSPS were promulgated for this source category.

The control of emissions of particulate matter from portland cement plants requires not only the installation of properly designed equipment, but also the operation and maintenance of that equipment. Emissions of particulate matter from portland cement plants are the result of operation of kilns, clinker coolers, raw mill systems, raw mill dryers, raw material storage, clinker storage, finished product storage, conveyor transfer points, bagging and bulk loading and unloading systems. These standards rely on the capture of particulate emissions by a baghouse or electrostatic precipitator.

In order to ensure compliance with these standards, adequate reporting and recordkeeping is necessary. In the absence of such information, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA regional office. Notifications are used to inform the Agency or delegated authority when a source becomes subject to the standard. The reviewing authority may then inspect the source to check if the pollution control devices are properly installed and operated. Performance test reports are needed as these are the Agency's record of a source's initial capability to comply with the emission standard and note the operating conditions under which compliance was achieved. The quarterly reports are used for problem identification, as a check on source operation and maintenance, and for compliance determinations. The standard also requires semiannual reporting of deviations from monitored opacity, as this is a good indicator of the source's compliance status.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15,

and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 64.4 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Portland Cement Plants.

Estimated Number of Respondents: 118.

Frequency of Response: Initially and semiannually.

Estimated Total Annual Hour Burden: 15,978 hours.

Estimated Total Annual Costs: \$1,552,045, which includes \$37,000 annualized capital/startup costs, \$495,600 annual O&M costs, and \$1,019,445 annual labor costs.

Changes in the Estimates: There is an increase of 8,010 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is primarily due to an increase in the estimated number of existing affected sources from 113 to 118 and an increase in the number of hours to submit semiannual reports from 16 hours to 24 hours.

Dated: November 13, 2004.

Director, Collection Strategies Division.
