**Purpose:** The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2005 cooperative agreement funds to establish up to ten National Academic Centers of Excellence (ACE) on Youth Violence Prevention, serving as national models for the prevention of youth violence. The purpose of the Centers is to help communities prevent youth interpersonal violence. As of 2005, Centers will be supported for up to ten years to promote a stable, long term focus on the complex problem of youth violence, fostering multidisciplinary and multi-sectoral interactions that can stimulate scientific creativity, speed new developments in youth interpersonal violence research and practice, and hasten translation of knowledge into health and community practice. Centers are expected to actively foster an environment conducive to reciprocally beneficial collaborations among health scientists, social scientists and the affected communities with the common goal of reducing youth interpersonal violence.

Youth violence is defined as: The intentional use of physical force or power, threatened or actual, exerted by or against children, adolescents or young adults, ages 10-24, which results in or has a high likelihood of resulting in injury, death, psychological harm, maldevelopment, or deprivation. It includes violence between individuals or groups who may or may not know each other. It frequently takes place outside the home, in the streets, or in institutional settings, such as schools, workplaces, and prisons. Hereafter,

youth violence and youth interpersonal violence will be used synonymously.

This program addresses the "Healthy People 2010" focus area of Injury and Violence Prevention. For a copy of "Healthy People 2010" visit the Internet site: <http://www.health.gov/healthypeople>.
