SUPPLEMENTARY INFORMATION: On October 4, 2004, we published a notice in the **Federal Register** (69 FR 59181-59182, Docket No. 04-076-1) in which we advised the public that the Animal and Plant Health Inspection Service (APHIS) has received a petition from Monsanto Company of St. Louis, MO (Monsanto) seeking a determination of nonregulated status for cotton designated as MON 88913, which has been genetically engineered for tolerance to the herbicide glyphosate. The petition has been submitted in accordance with our regulations concerning the introduction of certain genetically engineered organisms and products. In accordance with those regulations, our notice solicits public comments on whether this cotton presents a plant pest risk. In the notice, we also made available for public comment an environmental assessment (EA) for the proposed determination of nonregulated status. As stated in that notice, we will consider all comments we receive on or before December 3, 2004.

On November 8, 2004, APHIS received a letter from Monsanto amending the petition made available for public comment in our October 4, 2004, notice. The information in the addendum clarifies information in the petition with respect to the molecular

genetic characterization of the inserted DNA and corrects portions of that section. APHIS promptly reviewed these changes and determined that they had no impact on the EA we prepared to examine any environmental impacts of the proposed determination for the subject cotton. The addendum has been added to the petition file and is available to facilitate the review of the petition.

We continue to solicit written comments from interested persons on the petition and the EA. In addition to the amended petition, the EA and any comments received are available for public review. Copies of the amended petition and the EA are available as indicated in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

After the comment period closes, APHIS will review the data submitted by the petitioner, all written comments received during the comment period, and any other relevant information. After reviewing and evaluating the comments on the petition and the EA and other data and information, APHIS will furnish a response to the petitioner, either approving the petition in whole or in part, or denying the petition. APHIS will then publish a notice in the **Federal Register** announcing the regulatory status of Monsanto's glyphosate-tolerant MON 88913 cotton and the availability of APHIS' written decision.
