¹ In a *Report and Order*, 69 FR 3257 (Jan. 23, 2004), the Commission adopted rules for both unlicensed (part 15) and licensed (part 101) use of portions of these bands. The instant Public Notice concerns licensed use of the bands, which involves all of the bands except for 100 megahertz of spectrum at 94.0-94.1 GHz. For convenience only, we refer to the licensed spectrum herein as "the bands," "the Millimeter Wave 70/80/90 GHz Radio Service," or "the 71-95 GHz bands"; such references do not include 94.0-94.1 GHz.

I. Background

On October 16, 2003, the Commission adopted a *Report and Order*, 69 FR 3257, January 23, 2004, establishing service rules to promote non-Federal Government development and use of the "millimeter wave" spectrum in the 71-76 GHz, 81-86 GHz and 92-95 GHz bands² on a shared basis with Federal Government operations. These bands are essentially undeveloped and available for use in a broad range of new products and services, including high-speed, point-to-point wireless local area networks and broadband Internet access. Highly directional, "pencil-beam" signal characteristics permit systems in these bands to be engineered in close proximity to one another without causing interference. Thus, the Commission adopted a flexible and innovative regulatory framework for the 71-95 GHz bands that would not require traditional frequency coordination among non-Federal Government users. Under this approach, the Commission will issue an unlimited number of non-exclusive nationwide licenses to non-Federal Government entities for the 12.9 gigahertz of spectrum allocated for commercial use. These licenses will serve as a prerequisite for registering individual point-to-point links. The 71-95 GHz bands are allocated on a shared basis with Federal Government users. Therefore, a licensee will not be authorized to operate a link under its non-exclusive nationwide license until the link is both (i) coordinated with the National Telecommunications and Information Administration (NTIA) with respect to Federal Government operations and (ii) registered as an approved link with the FCC (interim process) or third-party Database Manager (permanent process).

NTIA coordination. NTIA is developing an automated coordination mechanism that will allow non-Federal Government users and independent database managers (Database Managers) selected by the FCC³ to use an Internet

² On February 23, 2004, The Wireless Communications Association International, Inc. filed a petition for reconsideration of certain aspects of the *Report and Order*. That petition will be handled by separate order, and the issuance of this Public Notice is not intended to prejudge or resolve any of the issues raised by the petitioner.
