

General Counsel, Entergy Nuclear Operations, Inc., 440 Hamilton Avenue, White Plains, NY 10601, attorney for the licensee.

For further details with respect to this action, see the application for amendment dated September 10, 2003, as supplemented on October 1, 2003, October 28, 2003 (2 letters), January 31, 2004 (2 letters), March 4, 2004, and May 19, 2004, which are available for public inspection at the Commission's PDR, located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the ADAMS Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR Reference staff by telephone at 1-800-397-4209, 301-415-4737, or by e-mail to pdr@nrc.gov.

Dated at Rockville, Maryland, this 25th day of June, 2004.

For the Nuclear Regulatory Commission.

Richard B. Ennis,

Senior Project Manager, Section 2, Project Directorate I, Division of Licensing Project Management, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 40-8027-MLA-9 and ASLBP No. 04-824-06-MLA]

Sequoyah Fuels Corporation; Establishment of Atomic Safety and Licensing Board

Pursuant to delegation by the Commission dated December 29, 1972, published in the **Federal Register**, 37 FR 28,710 (1972), and the Commission's regulations, see 10 CFR 2.104, 2.300, 2.303, 2.309, 2.311, 2.318, and 2.321, notice is hereby given that an Atomic Safety and Licensing Board is being established to preside over the following proceeding: Sequoyah Fuels Corporation, Gore, Oklahoma Site, (Materials License Amendment).

This proceeding concerns a request for hearing submitted on May 17, 2004, by the State of Oklahoma. That request was filed in response to a March 10, 2004 notice of receipt of a January 7, 2004 materials amendment request from Sequoyah Fuels Corporation to authorize a proposed raffinate dewatering project at its Gore,

Oklahoma facility site, and of opportunity for a hearing which was published in the **Federal Register** on March 17, 2004 (69 FR 12,715).

The Board is comprised of the following administrative judges: Alan S. Rosenthal, Chair, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Dr. Anthony J. Baratta, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001. Dr. Richard F. Cole, Atomic Safety and Licensing Board Panel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

All correspondence, documents, and other materials shall be filed with the administrative judges in accordance with 10 CFR 2.302.

Issued at Rockville, Maryland, this 25th day of June 2004.

G. Paul Bollwerk, III,

Chief Administrative Judge, Atomic Safety and Licensing Board Panel.

[FR Doc. 04-14905 Filed 6-30-04; 8:45 am]

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Number 030-20567]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for Issuance of a License Renewal for Byproduct Material License No. 24-21362-01 for American Radiolabeled Chemicals, Inc., St. Louis, MO

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability of Environmental Assessment and Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT:

William Snell, Division of Nuclear Materials Safety, U.S. Nuclear Regulatory Commission, Region III, 2443 Warrenville Road, Lisle, Illinois 60532; telephone (630) 829-9871; or by e-mail at wgs@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the renewal of Byproduct Material License No. 24-21362-01 issued to American Radiolabeled Chemicals, Inc. (the licensee), in St. Louis, Missouri.

The NRC staff has prepared this environmental assessment (EA) to support this licensing action in accordance with the requirements of 10

CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

II. Environmental Assessment Summary

The proposed action is to renew Byproduct Material License No. 24-21362-01 issued to the American Radiolabeled Chemicals, Inc. in St. Louis, Missouri. American Radiolabeled Chemicals is licensed to possess byproduct materials to be used in the manufacture and synthesis of radiolabeled chemicals. The licensee primarily uses tritium (H-3) and carbon-14 (C-14), and as a result of licensed activities releases curie quantities of H-3 and C-14 in airborne effluent releases. American Radiolabeled Chemicals, Inc. requested by letter to the NRC dated October 28, 2002, the renewal of Byproduct Material License No. 24-21362-01, which would have expired on November 30, 2002. The American Radiolabeled Chemicals, Inc. provided radiological airborne effluent release data, radiological air sampling data, and computational results to demonstrate compliance with 10 CFR 20.1201, "Occupational Dose Limits for Adults," and 10 CFR 20.1301, "Dose Limits for Individual Members of the Public." No licensee activities are required to complete the proposed action. The NRC staff has reviewed the radiological airborne effluent release data, radiological air sampling data, and computational results provided by American Radiolabeled Chemicals to ensure the NRC's decision is protective of public health and safety and the environment.

III. Finding of No Significant Impact

The staff has prepared the EA, summarized above, in support of American Radiolabeled Chemicals, Inc.'s request to renew Byproduct Material License No. 24-21362-01. Based on its review, the staff has determined that there are no radiological or non-radiological environmental impacts associated with the renewal of American Radiolabeled Chemicals, Inc.'s license. The staff also finds that American Radiolabeled Chemicals demonstrated compliance with the occupational dose limits for adults in 10 CFR 20.1201 and the dose limits for individual members of the public in 20.1301, and finds no other activities in the area that could result in cumulative impacts. On the basis of the EA, the staff has concluded that the environmental impacts from the

proposed action would not be significant. Accordingly, the staff has determined that a FONSI is appropriate, and has determined that the preparation of an Environmental Impact Statement is not warranted.

IV. Further Information

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," American Radiolabeled Chemicals, Inc.'s request, the EA summarized above, and the documents related to this proposed action, are available electronically for public inspection and copying from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. These documents include American Radiolabeled Chemicals' letter dated October 28, 2002, (Accession No. ML041540462); and the EA summarized above (Accession No. ML041680276). These documents may also be viewed electronically on the public computers located at the NRC's Public Document Room (PDR), O 1 F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. The PDR reproduction contractor will copy documents for a fee. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR reference staff by telephone at 1-800-397-4209 or (301) 415-4737, or by e-mail to pdr@nrc.gov.

Dated at Lisle, Illinois, this 17th day of June 2004.

Kenneth G. O'Brien,

Chief, Decommissioning Branch, Division of Nuclear Materials Safety, RIII.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[Docket Number 030-08597]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for Northwest Missouri State University, Maryville, MO

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability of environmental assessment and finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Dr. Peter J. Lee, Division of Nuclear Materials Safety, U.S. Nuclear Regulatory Commission, Region III,

2443 Warrenville Road, Suite 210, Lisle, Illinois 60532-4352; telephone (630) 829-9870; or by e-mail at pjl2@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is considering the issuance of a license amendment to Byproduct Material License No. 24-15118-01 issued to Northwest Missouri State University (formerly known as Northwest Missouri State College) (the licensee), to terminate its license and authorize release of its Maryville, Missouri facility for unrestricted use.

The NRC staff has prepared an Environmental Assessment (EA) in support of this licensing action in accordance with the requirements of 10 CFR part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

II. Environmental Assessment Summary

The purpose of the proposed action is to terminate Northwest Missouri State University's license and release its Maryville, Missouri facility for unrestricted use. In May 1972, the NRC authorized Northwest Missouri State University to use radioisotopes such as phosphorus-32 (P-32), iodine-25 (I-25), tritium (H-3), and carbon-14 (C-14), etc. for laboratory experiments and teaching and training of students. On December 19, 2003, Northwest Missouri State University submitted a license amendment request to terminate its license and release its Maryville facility for unrestricted use. The staff has examined Northwest Missouri State University's request and the information that the licensee provided in support of its request. The NRC staff concluded that the proposed action complies with the license termination criteria in subpart E of 10 CFR part 20 for unrestricted release.

III. Finding of No Significant Impact

The staff has prepared the EA, summarized above, in support of Northwest Missouri State University's proposed license amendment to terminate its license and release the Maryville facility for unrestricted use. Based on its review, the staff has determined that the affected environment and the environmental impacts associated with the decommissioning of Northwest Missouri State University's facility were bounded by the impacts evaluated by the "Generic Environmental Impact

Statement in Support of Rulemaking on Radiological Criteria for License Termination of NRC-Licensed Nuclear Facilities" (NUREG-1496). No outdoor areas were affected by the use of licensed materials. Additionally, no non-radiological impacts were identified. The staff also finds that the proposed release for unrestricted use of the Northwest Missouri State University's facility is in compliance with 10 CFR 20.1492. No other activities in the area that could have resulted in cumulative impacts. On the basis of the EA, the staff has concluded that the environmental impacts from the proposed action would not be significant. Accordingly, the staff has determined that a FONSI is appropriate, and has determined that the preparation of an Environmental Impact Statement is not warranted.

IV. Further Information

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," Northwest Missouri State University's request, the EA summarized above, and the documents related to this proposed action, are available electronically for public inspection and copying from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>. These documents include Northwest Missouri State University's NRC Form dated December 19, 2003, with enclosures (Accession No. ML041590566); and the EA summarized above (Accession No. ML041680287). These documents may also be viewed electronically on the public computers located at the NRC's Public Document Room (PDR), O 1 F21, One White Flint North, 11555 Rockville Pike, Rockville, MD 20852. The PDR reproduction contractor will copy documents for a fee. Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the NRC PDR reference staff by telephone at 1-800-397-4209 or (301) 415-4737, or by e-mail to pdr@nrc.gov.

Dated at Lisle, Illinois, this 17th day of June, 2004.
