##### The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend Class D and E4 airspace at Homestead, FL. Class D airspace designations for airspace areas extending upward from the surface of the earth and Class E airspace designations for airspace designated as surface areas are published in Paragraphs 5000 and 6004 respectively, of FAA Order 7400.9L, dated September 2, 2003, and effective September 16, 2003, which is incorporated by reference in 14 CFR 71.1. The Class D and E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

**Proposed Establishment of Class D and E Airspace, Proposed Amendment of Class E Airspace; New Smyrna Beach, FL**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This notice proposes to establish Class D and Class E4 airspace and amend Class E5 airspace at New Smyrna Beach, FL. A federal contract tower with a weather reporting system is being constructed at the New Smyrna Beach Municipal Airport. Therefore, the airport will meet the criteria for establishment of Class D and Class E4 airspace. Class D surface area airspace and Class E4 airspace designated as an extension to Class D airspace is required when the control tower is open to contain existing Standard Instrument Approach Procedures (SIAPs) and other Instrument Flight Rules (IFR) operations at the airport. This action would establish Class D airspace extending upward from the surface, to but not including 1,200 feet MSL, within a 3.2-mile radius of the New Smyrna Beach Municipal Airport and a Class E4 airspace extension that is 5 miles wide and extends 7 miles southeast of the airport. A regional evaluation has determined the existing Class E5 airspace area should be amended to contain the Nondirectional Radio Beacon (NDB) Or Global Positioning System (GPS) runway (RWY) 29 SIAP. As a result, controlled airspace extending upward from 700 feet Above Ground Level (AGL) needed to contain the SIAP will increase from a 6.5-mile radius of the airport to a 6.6-mile radius of the airport and provide for the procedure turn area.

**DATES:** Comments must be received on or before March 22, 2004.
