

protecting the health and economic interests of consumers and encouraging fair international trade in food. Through adoption of food standards, codes of practice, and other guidelines developed by its committees, and by promoting their adoption and implementation by governments, Codex seeks to ensure that the world's food supply is sound, wholesome, free from adulteration, and correctly labeled. In the United States, USDA, FDA, and the Environmental Protection Agency (EPA) manage and carry out U.S. Codex activities.

The Codex Committee on Food Labelling (CCFL) drafts provisions on labelling applicable to all foods; considers, amends if necessary, and endorses specific provisions on labelling of draft standards, codes of practice, and guidelines prepared by other Codex committees; studies specific labelling problems assigned to it by the Commission; and studies problems associated with the advertisement of food with particular reference to claims and misleading descriptions. The Committee is chaired by Canada.
