Requests for additional information or copies of the information collection instrument and instructions should be directed to Kara Dodge, NOAA/NMFS/NERO, Protected Resources Division, One Blackburn Drive, Gloucester, MA 01930 (Phone 978–281–9328 x6529).

SUPPLEMENTARY INFORMATION:

I. Abstract

This collection of information involves sea turtles becoming accidentally entangled in active or discarded fixed fishing gear. These entanglements may prevent the recovery of endangered and threatened sea turtle populations. NOAA Fisheries had established the Sea Turtle Disentanglement Network to promote reporting and increase successful disentanglement of sea turtles. As there is limited to no observer coverage of pot gear fisheries, NOAA Fisheries relies on the U.S. Coast Guard, fishing industry, stranding network, federal, state, and local authorities, and the public for this information. The information provided will help NOAA Fisheries better assess pot gear fisheries (lobster, whelk/conch, crab, fish trap) and their impacts on sea turtle populations in the northeast region (Maine to Virginia).

II. Method of Collection

Members of the Disentanglement Network and the public are requested to call and inform NOAA Fisheries of any sea turtle entanglements they encounter. Information provided in these phone calls (or by fax or mail) will include: name and type of reporting vessel, vessel cell phone number or radio call channel, reporter name and home phone number, date/time of report (and/or sighting event), location (latitude and longitude), description of turtle for species identification, status of turtle alive or dead, description of entangling gear (rope, line, buoys, colors, ID numbers), location of entangling gear on turtle (head, flippers, single wrap, multiple wraps), description of any visible injuries, and weather/sea conditions at the scene. Information will be collected by NOAA Fisheries when a sea turtle entanglement event occurs. Reports and documentation of dead or

injured sea turtles are also requested. NOAA Fisheries may request assistance from the responder to bring injured sea turtles to the appropriate stranding and rehabilitation facility for veterinary care when practical. NOAA Fisheries may also request assistance to bring fresh dead sea turtles to the appropriate stranding facility for necropsy.

III. Data
